

MicroStation V8i Visualization Update

Chris Bober - Director, MicroStation Product Line

Why Luxology?

- Produce high quality images using pre-configured settings to better balance speed and quality
- Deliver photo-realistic interior and exterior views using lighting and textures that mirror project reality
- Improve stakeholder insight and secure buy-in
- Validate the fit and finish of a project
- Secure project funding for design alternatives

MicroStation V8i (SELECTseries 1)

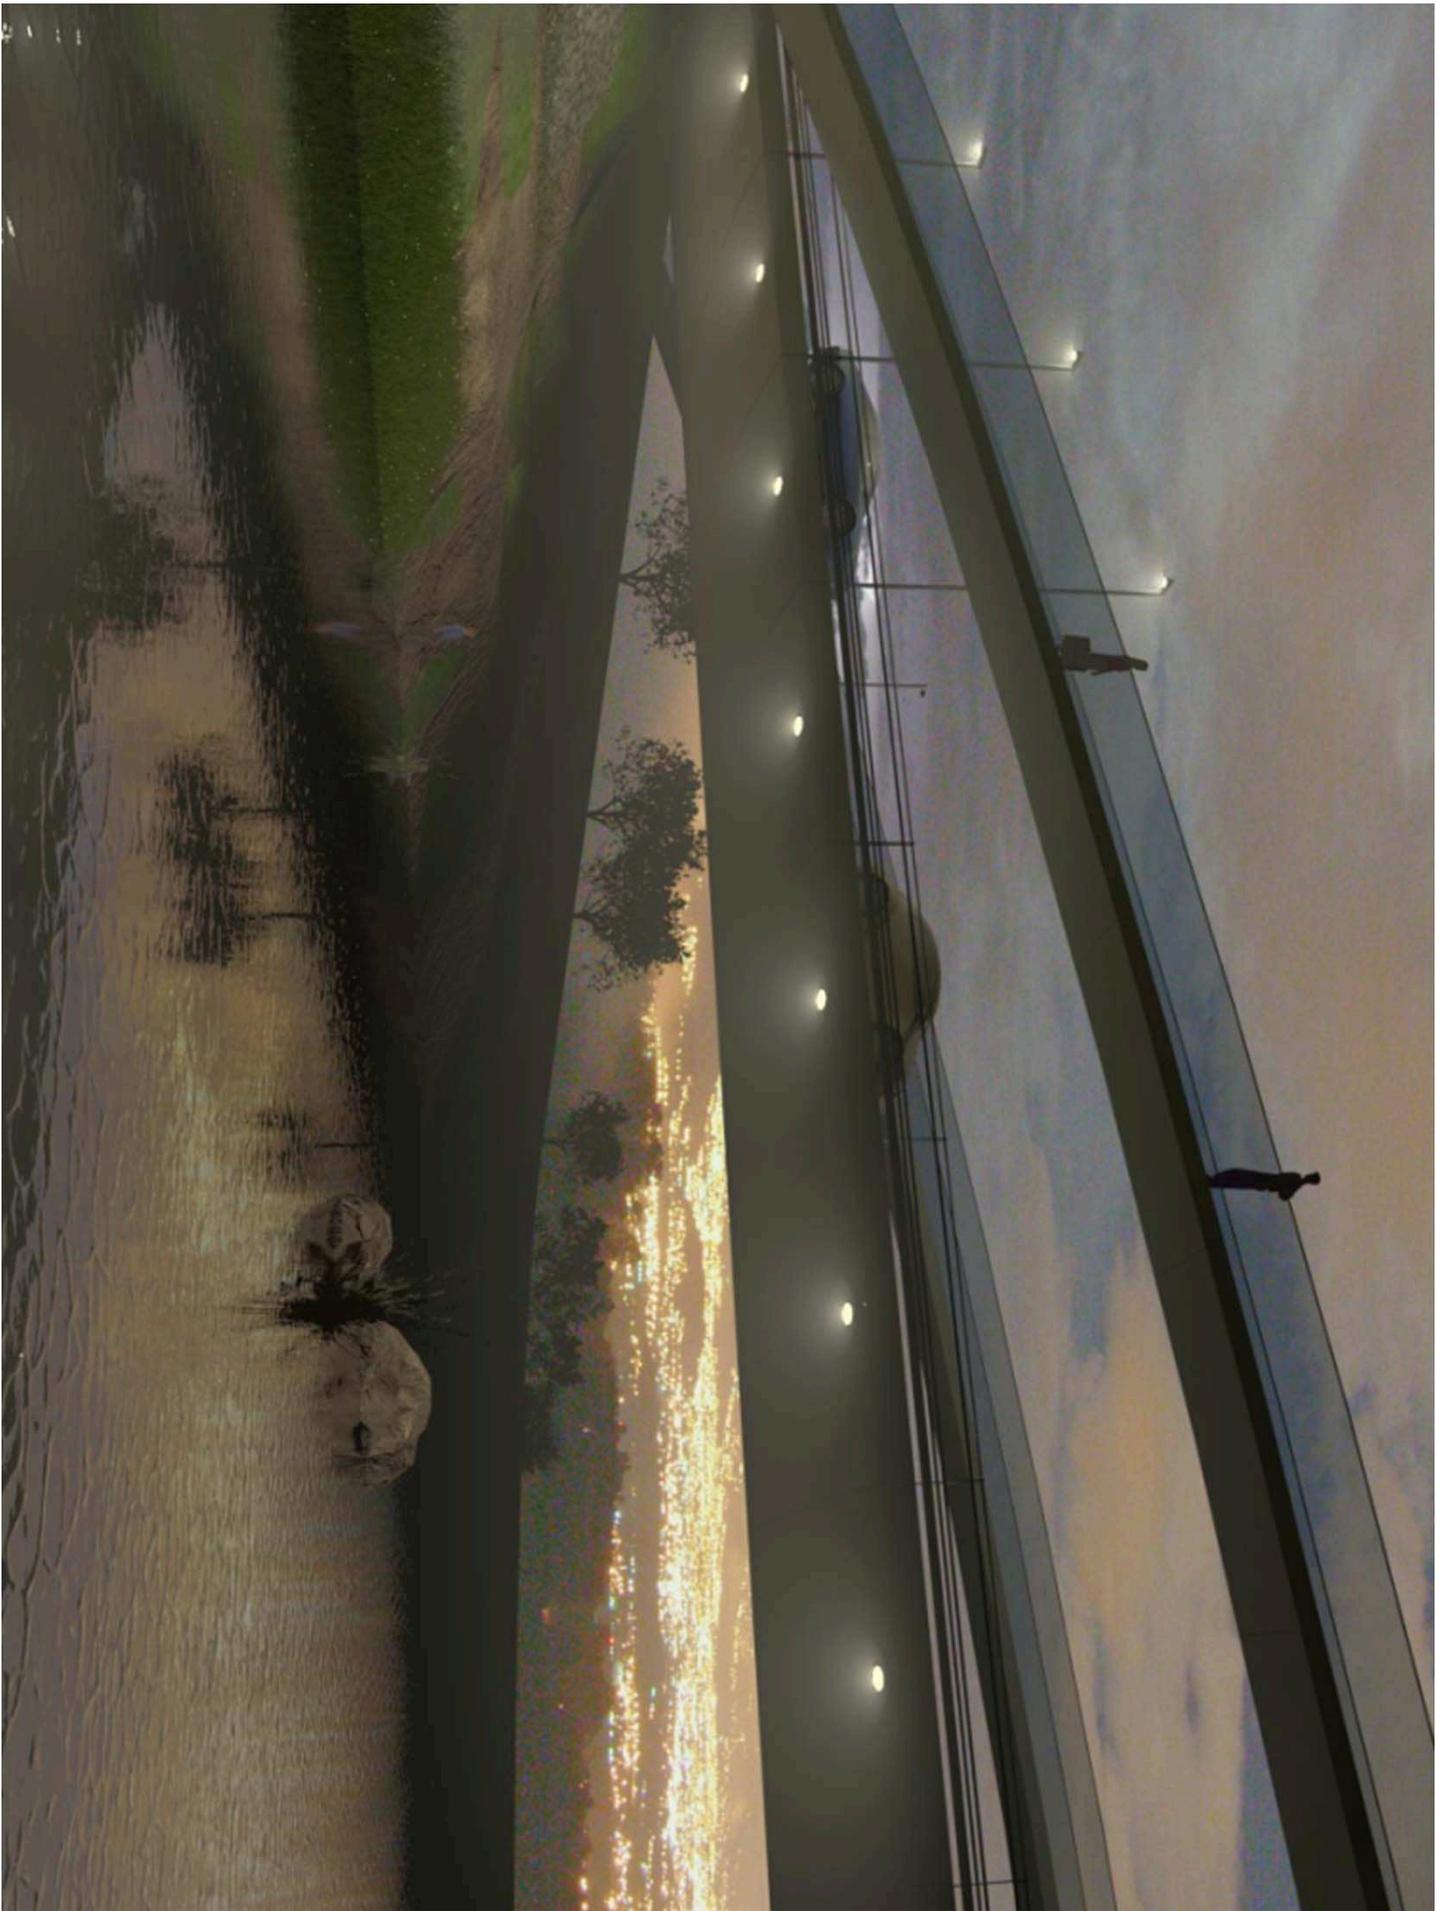

- Luxology Rendering Engine
 - Quality/Performance Slider
 - Material Preview Window
 - Per-material Shader Options
 - Material Preview Lighting
 - Glow Maps
 - Clear Coat Maps for Materials
 - Fur Rendering
 - Volume Lighting
 - Dome Lights
 - Reuse Solution
 - Fog
 - HDR Image Preview
- Updated Capabilities Based on Luxology Rendering Engine
 - Lighting Setups
 - Light Manager
 - Multi-layered Materials
 - Solar Study and FlyThrough
- Luxology Distributed Rendering System
- Animation
 - Camera Speed Control
 - Luxology Animation Tone Mapping

MicroStation V8i (SELECTseries 2)

- (SELECTseries 2)
 - Additional Render Outputs
 - Usability Improvements
 - Material Editor dialog
 - Light Manager dialog
 - Environment Settings dialog
 - Luxology Image Settings dialog
 - Luxology Render dialog
 - Animator Improvements

Simplified Lighting

The Iterative Advantage

- Save Time
 - Near real-time rendering
 - 64-bit rendering engine
 - Create time for more design review iterations
- Improve Quality
 - Photo-realistic images
 - Better design
 - Higher Project Win-Rate
- Increase Profits
 - More Efficient Teams
 - Lower Operating Costs

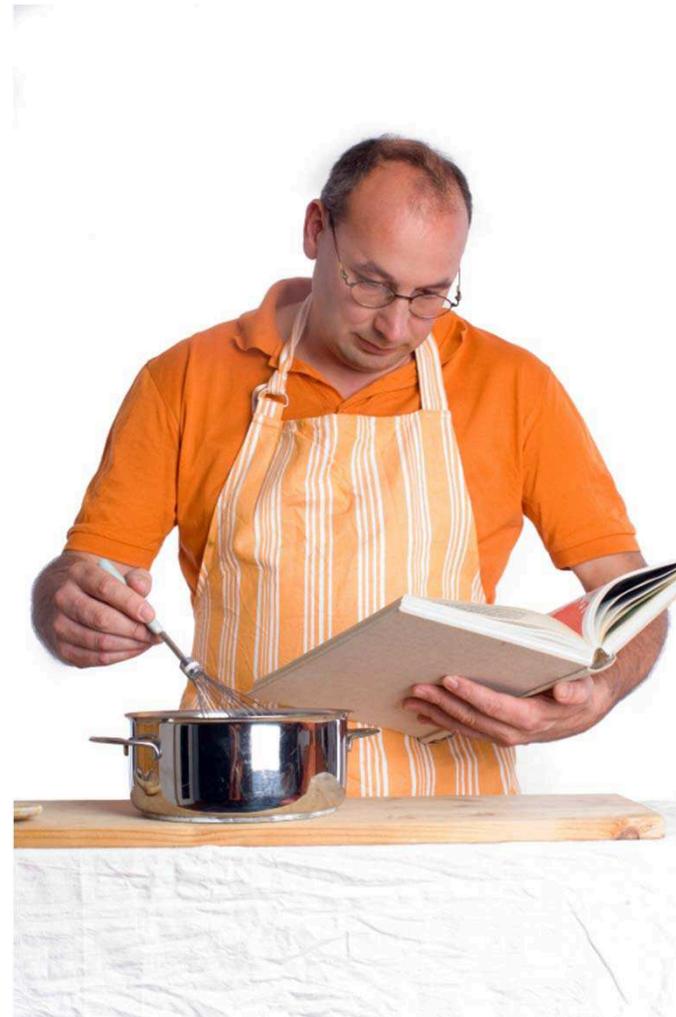

Recipe for Success

Visualization Recipe

- Main Ingredients
 - Camera
 - Render Settings
 - Lights
 - Environment
 - Materials
 - Output
 - Fast Hardware

Visualization Recipe

- Main Ingredients

 - Fast Hardware

Scene Composition

Camera

- Setup
- Define (Manipulate)
- Photomatch
- Camera Lens
- Focal Distance

Camera Setup

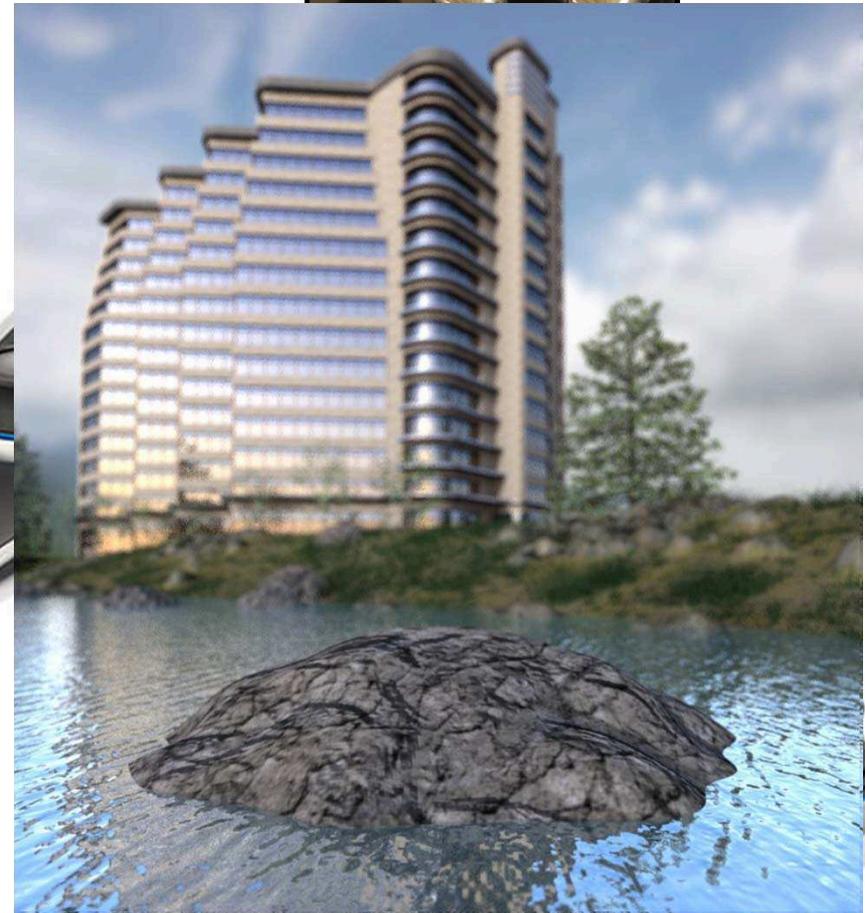

- New Camera Graphics
 - Pan
 - Tilt
 - Roll

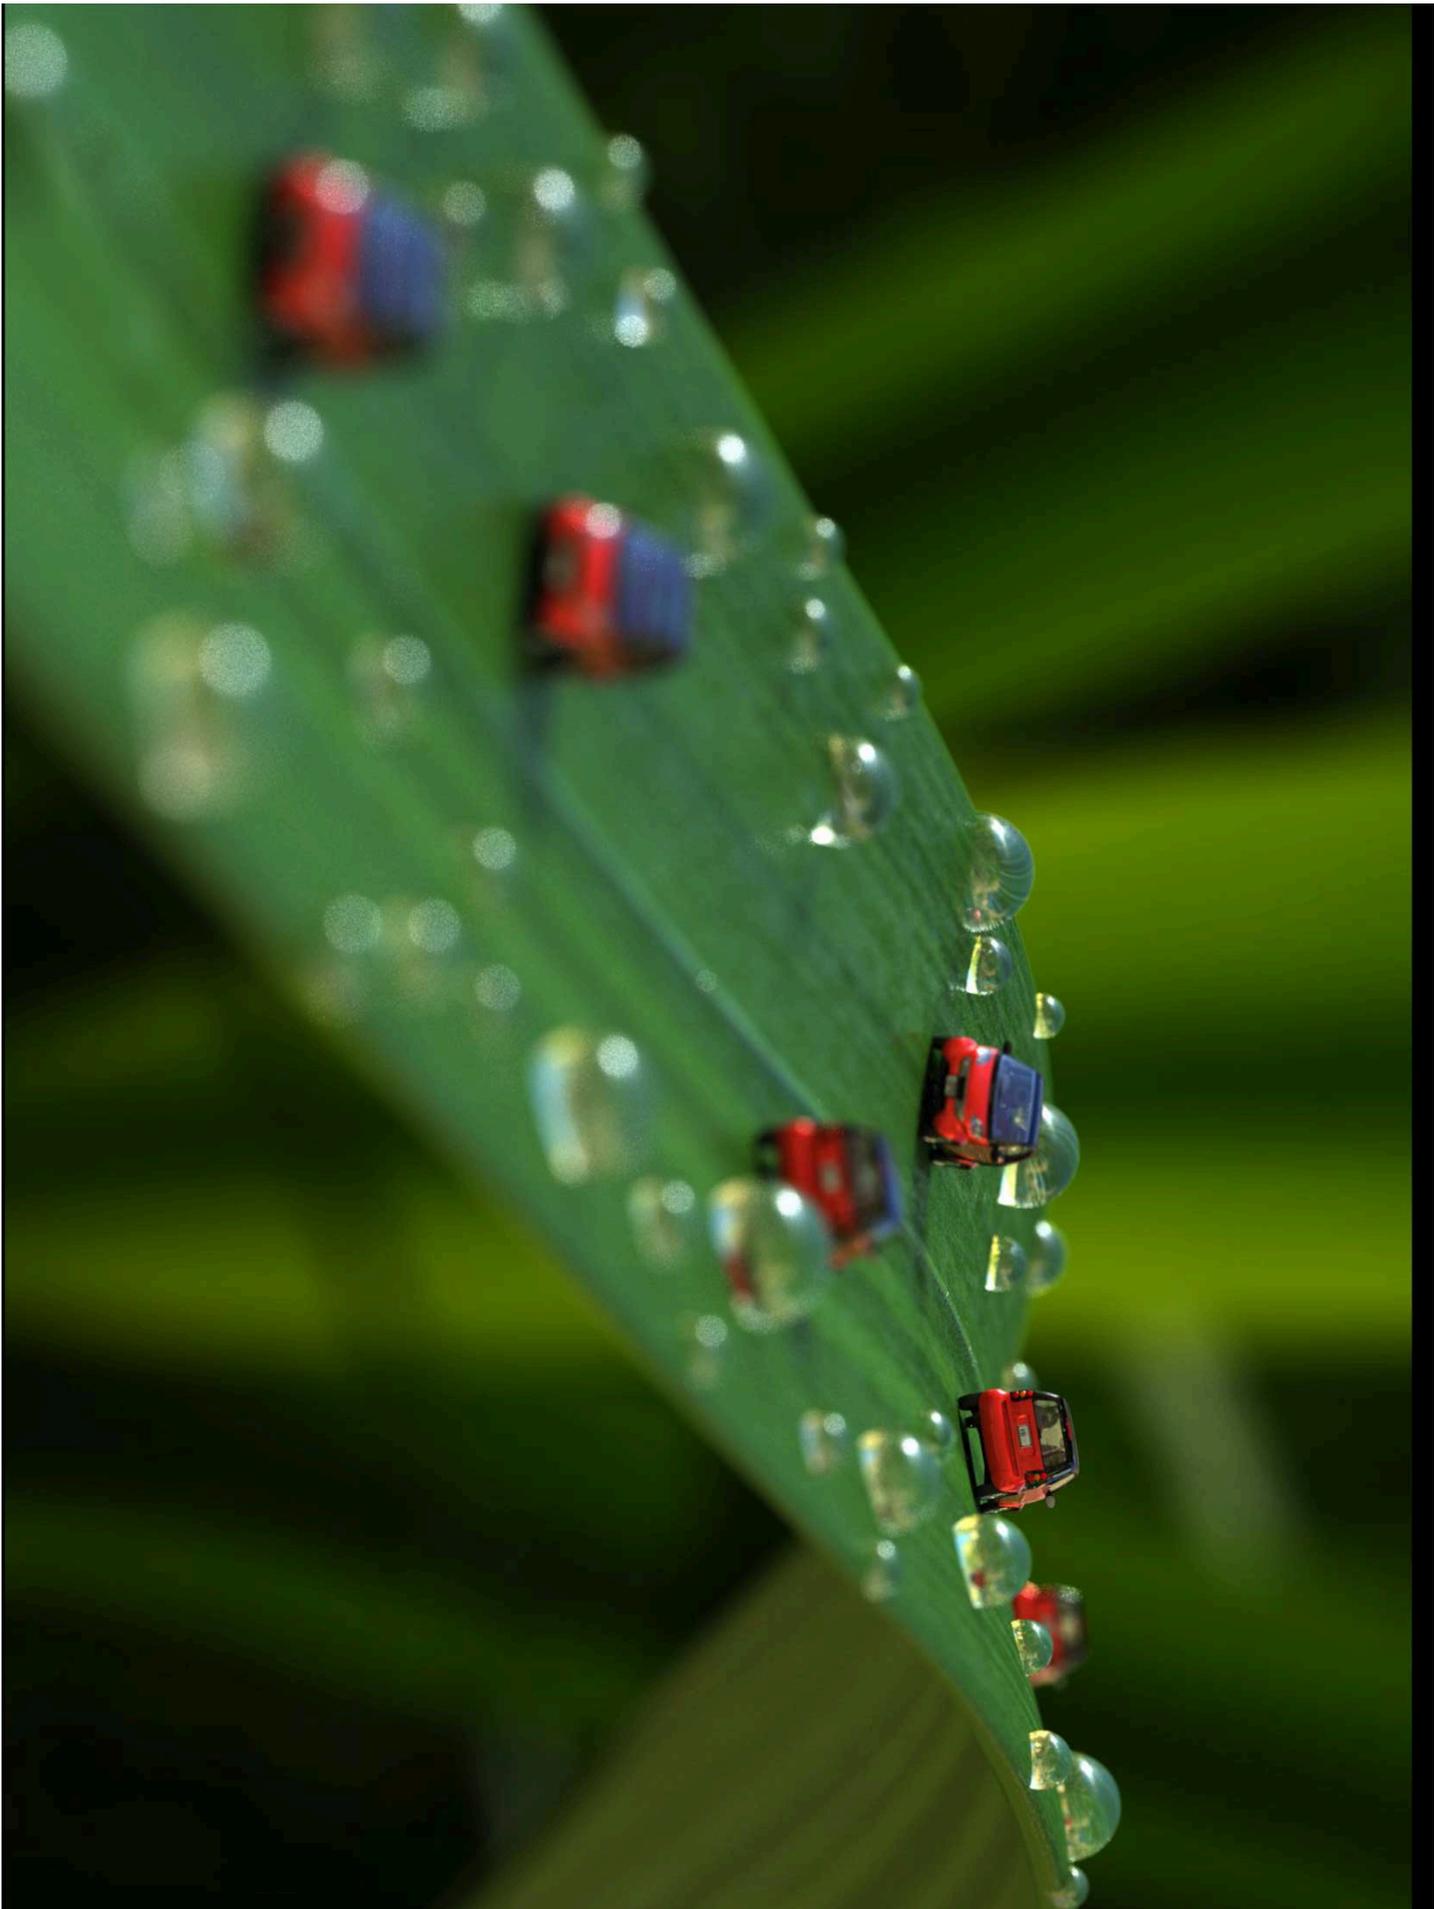

- Support for 3D Mice

- Focal Distance

- New Tool 

Lighting

With New Lighting in MicroStation V8i...

- High Quality
 - Consistent Lighting
 - Increased Depth
- Visually Reliable
 - Physically Correct
 - Undeniably Real
- Accurate
 - Light Conditions
 - Environments

Lighting in MicroStation V8i

- Global Illumination
 - Bounced light
 - Why settle for less
 - Even exteriors
- Extremely fast
- Easy to use
 - Ambient Occlusion

Lighting in MicroStation V8i

- High Dynamic Range Light Probes
- Physical & Gradient Skies

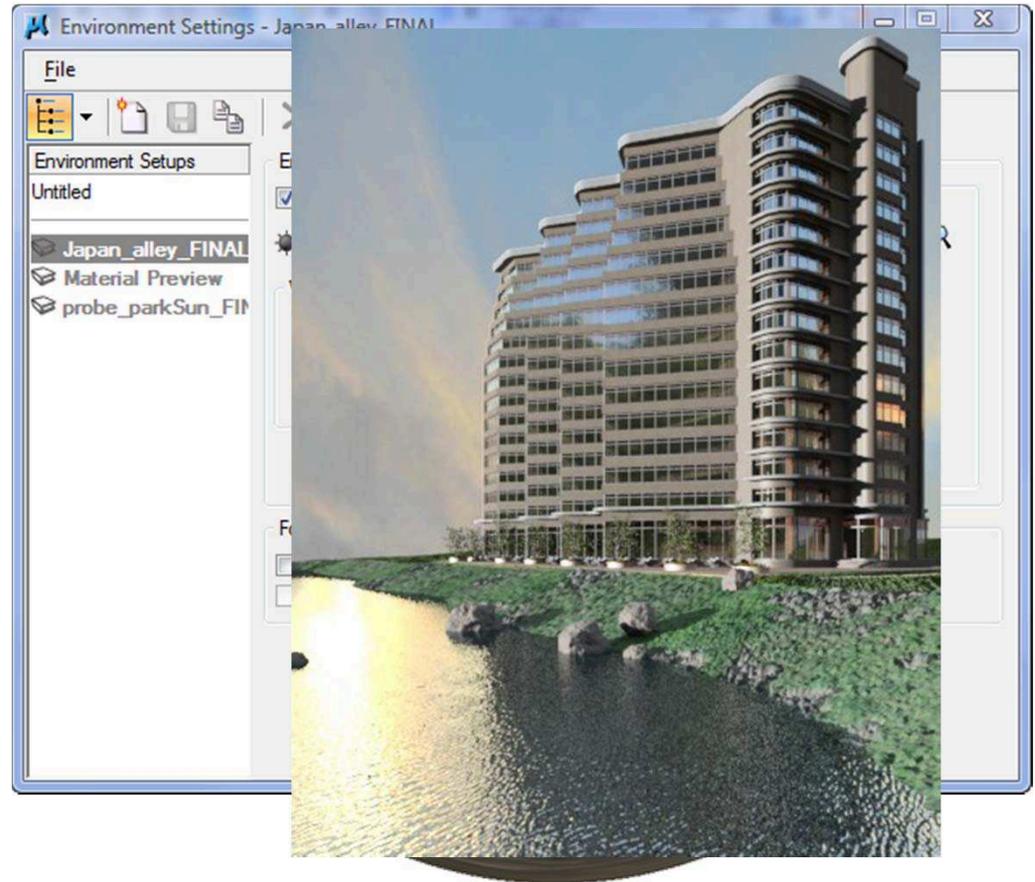

Volume Lighting Lighting in MicroStation V8i

Lighting in MicroStation V8i

- Spherical Environments
- HDR Light Probes
- Image Based Lighting
- Gradient Skies
- Physical Sky

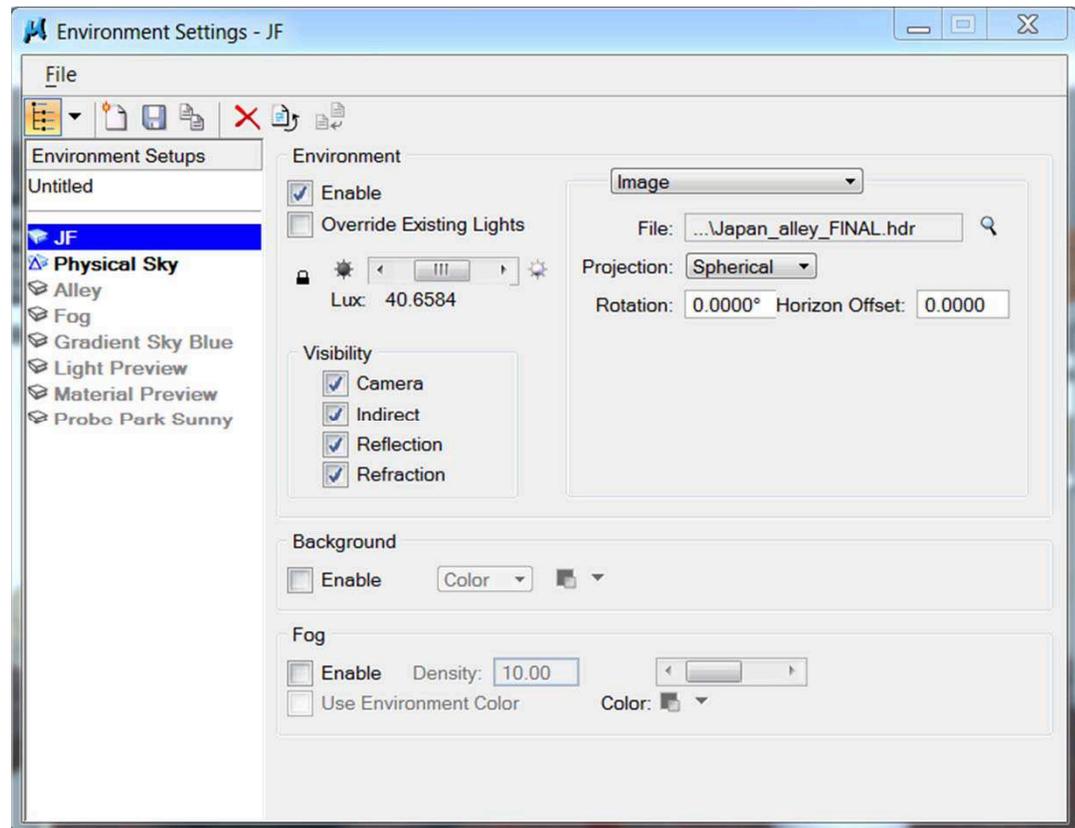

Lighting in MicroStation V8i

Visibility options

- Visible to camera
- Visible to Indirect lighting
- Visible to reflections
- Visible to refractions

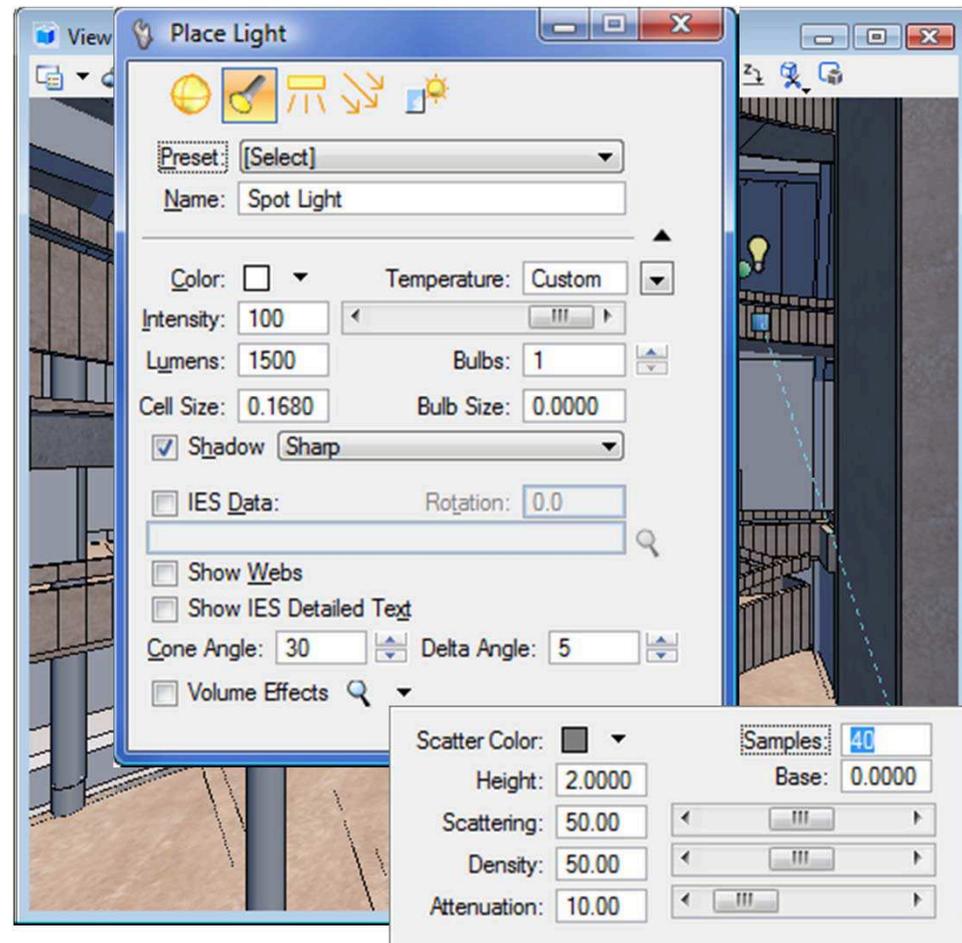

Horizon options

- Rotation
- Horizon Offset

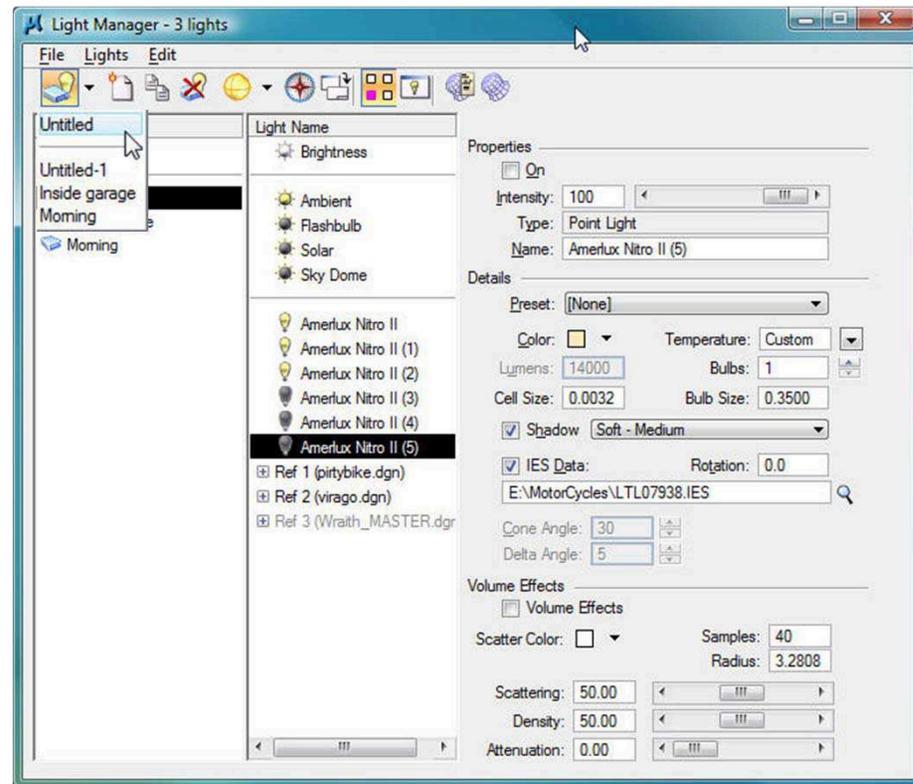

Lighting in MicroStation V8i

- Place Light
- Handles

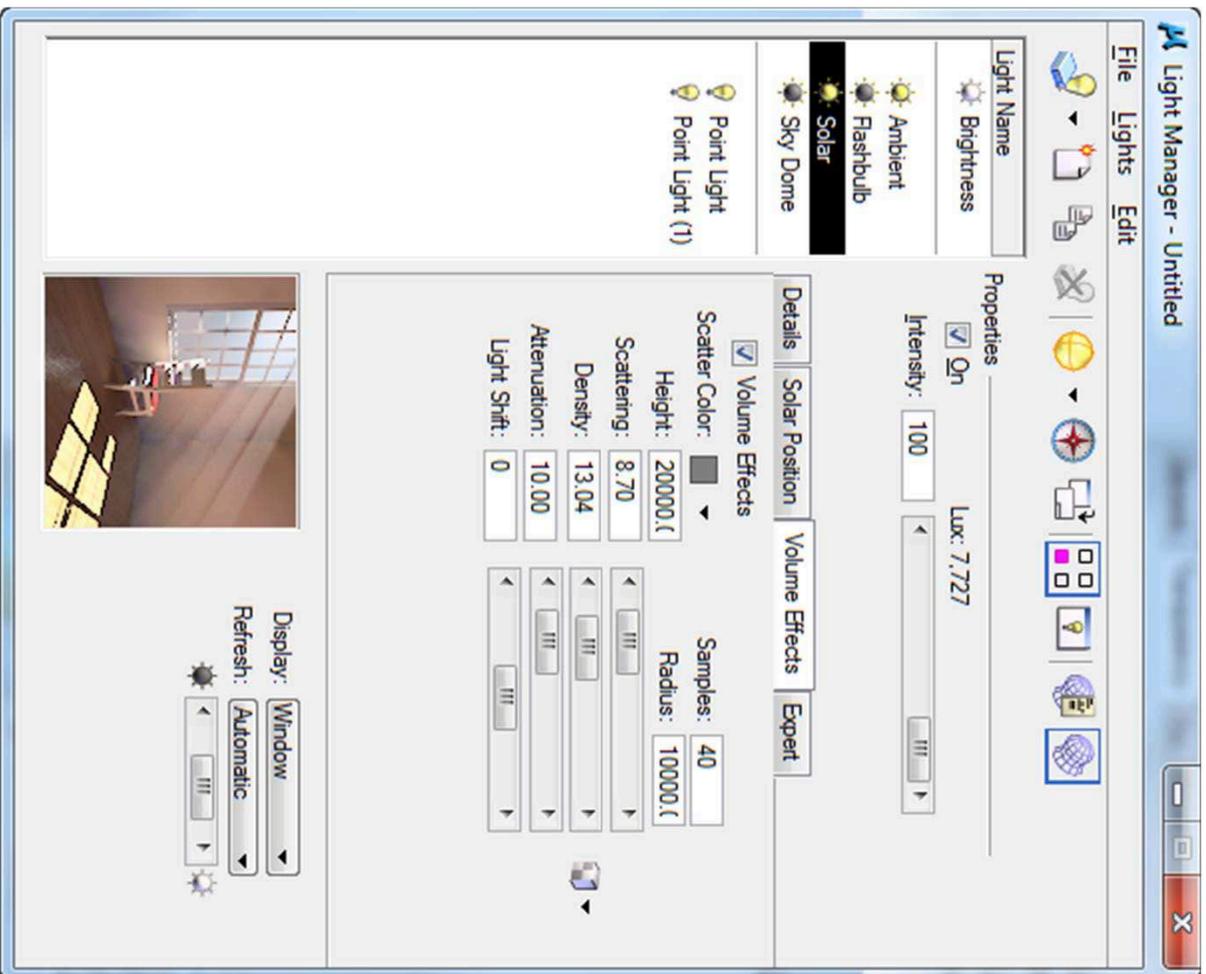

Lighting in MicroStation V8i

- Light Manager
- Light Setups

Light Manager

Materials

With Realistic Materials in V8i...

- High Quality
 - Images Appear 3D
 - Materials Come Alive
- Totally Convincing
 - Subtle Materials
 - Reflect Reality
- Physically Correct
 - True Visual Depth

Realistic Materials in MicroStation V8i

- Displacement mapping
- Blurry reflections
- Anisotropic materials
- Opacity maps
- Blurry refraction
- Clearcoat – Paints
- Clearcoat Maps
- Luminous – Glow lights
- Subsurface Scattering
- Dispersion (Prismatic)
- Fur
- Bentley_materials.dgnlib
- Entourage
- LXP

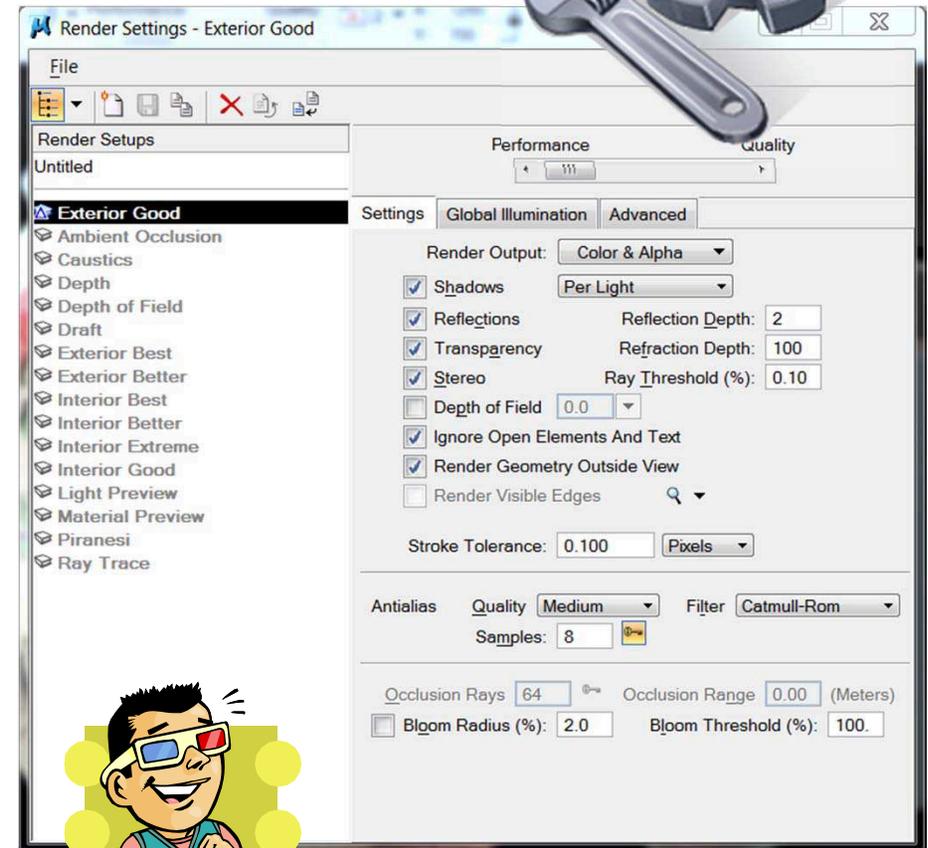

Rendering

Rendering in MicroStation V8i

- Render Settings
 - Ambient Occlusion
 - Caustics
 - Draft, Depth
 - Depth of Field
 - Exterior
 - Good, Better & Best
 - Interior
 - Good, Better, Best & Extreme
 - Preview (Light & Materials)

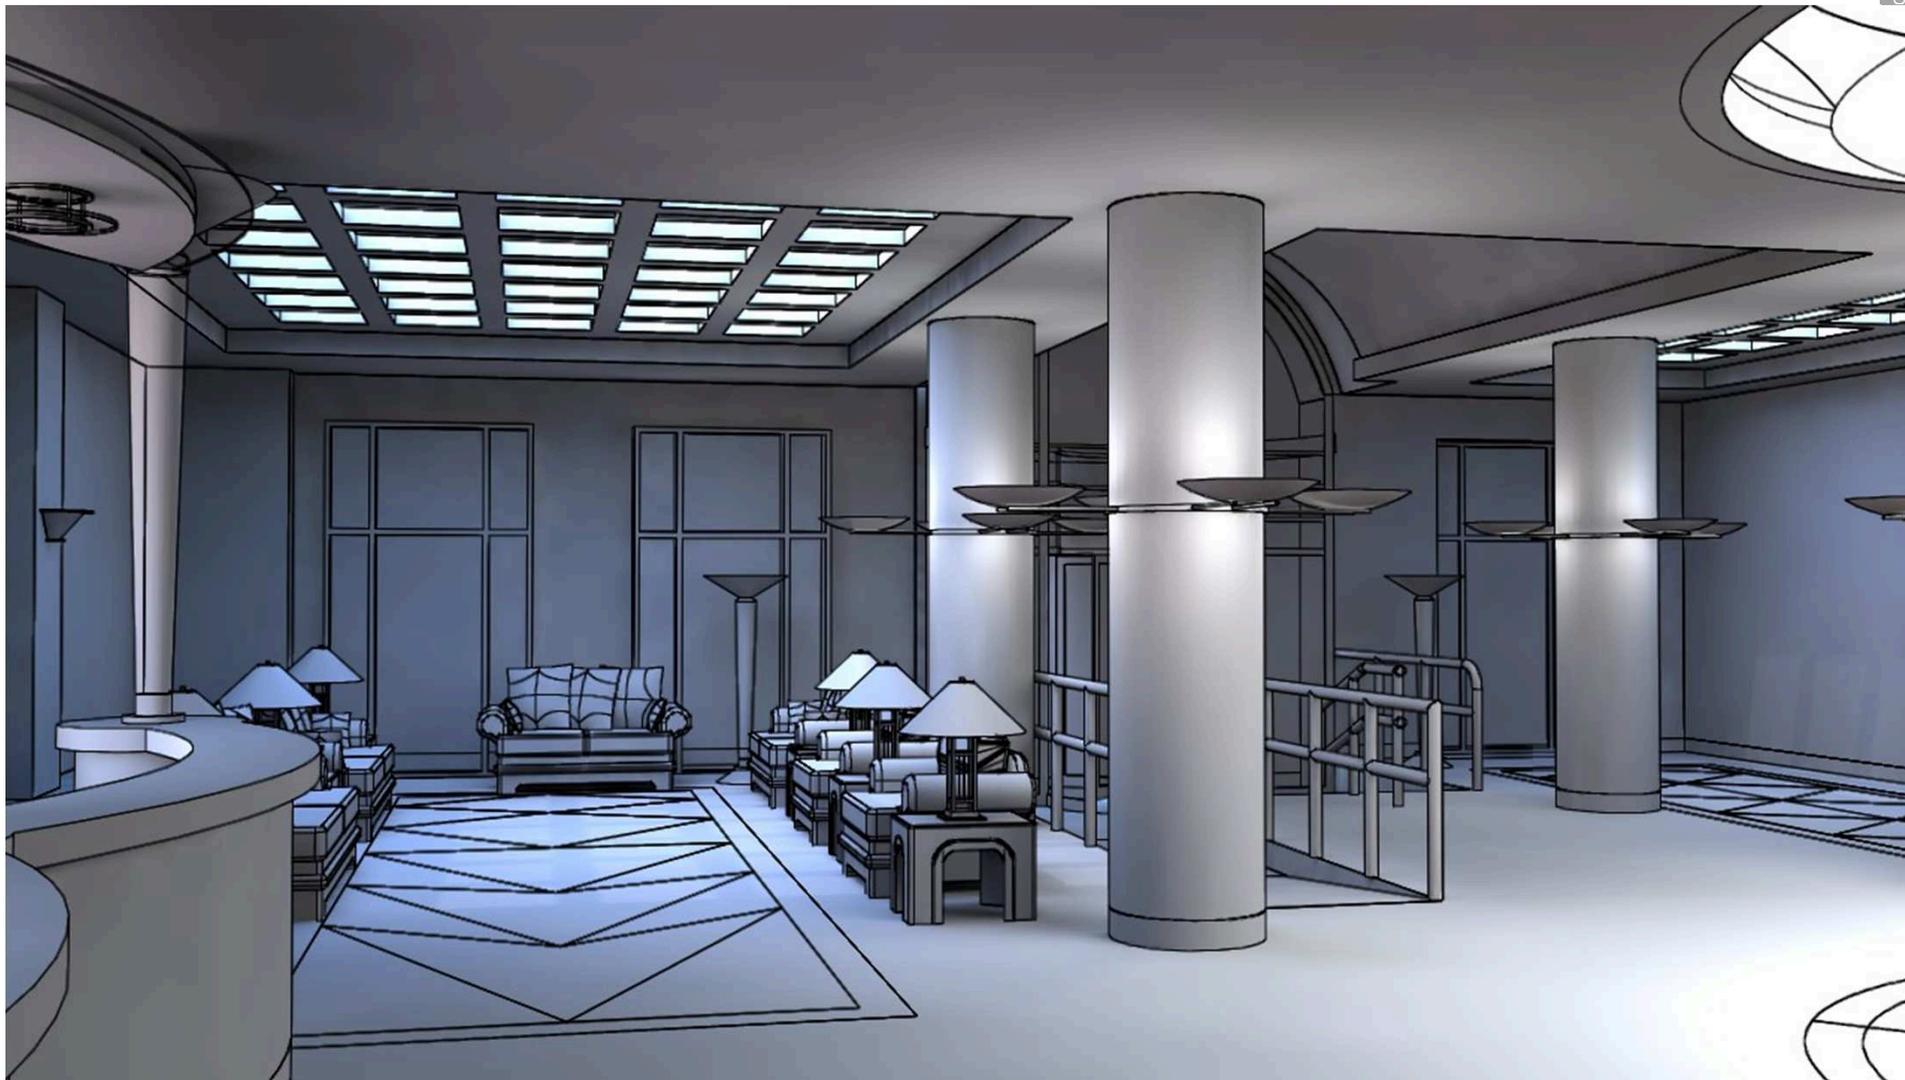

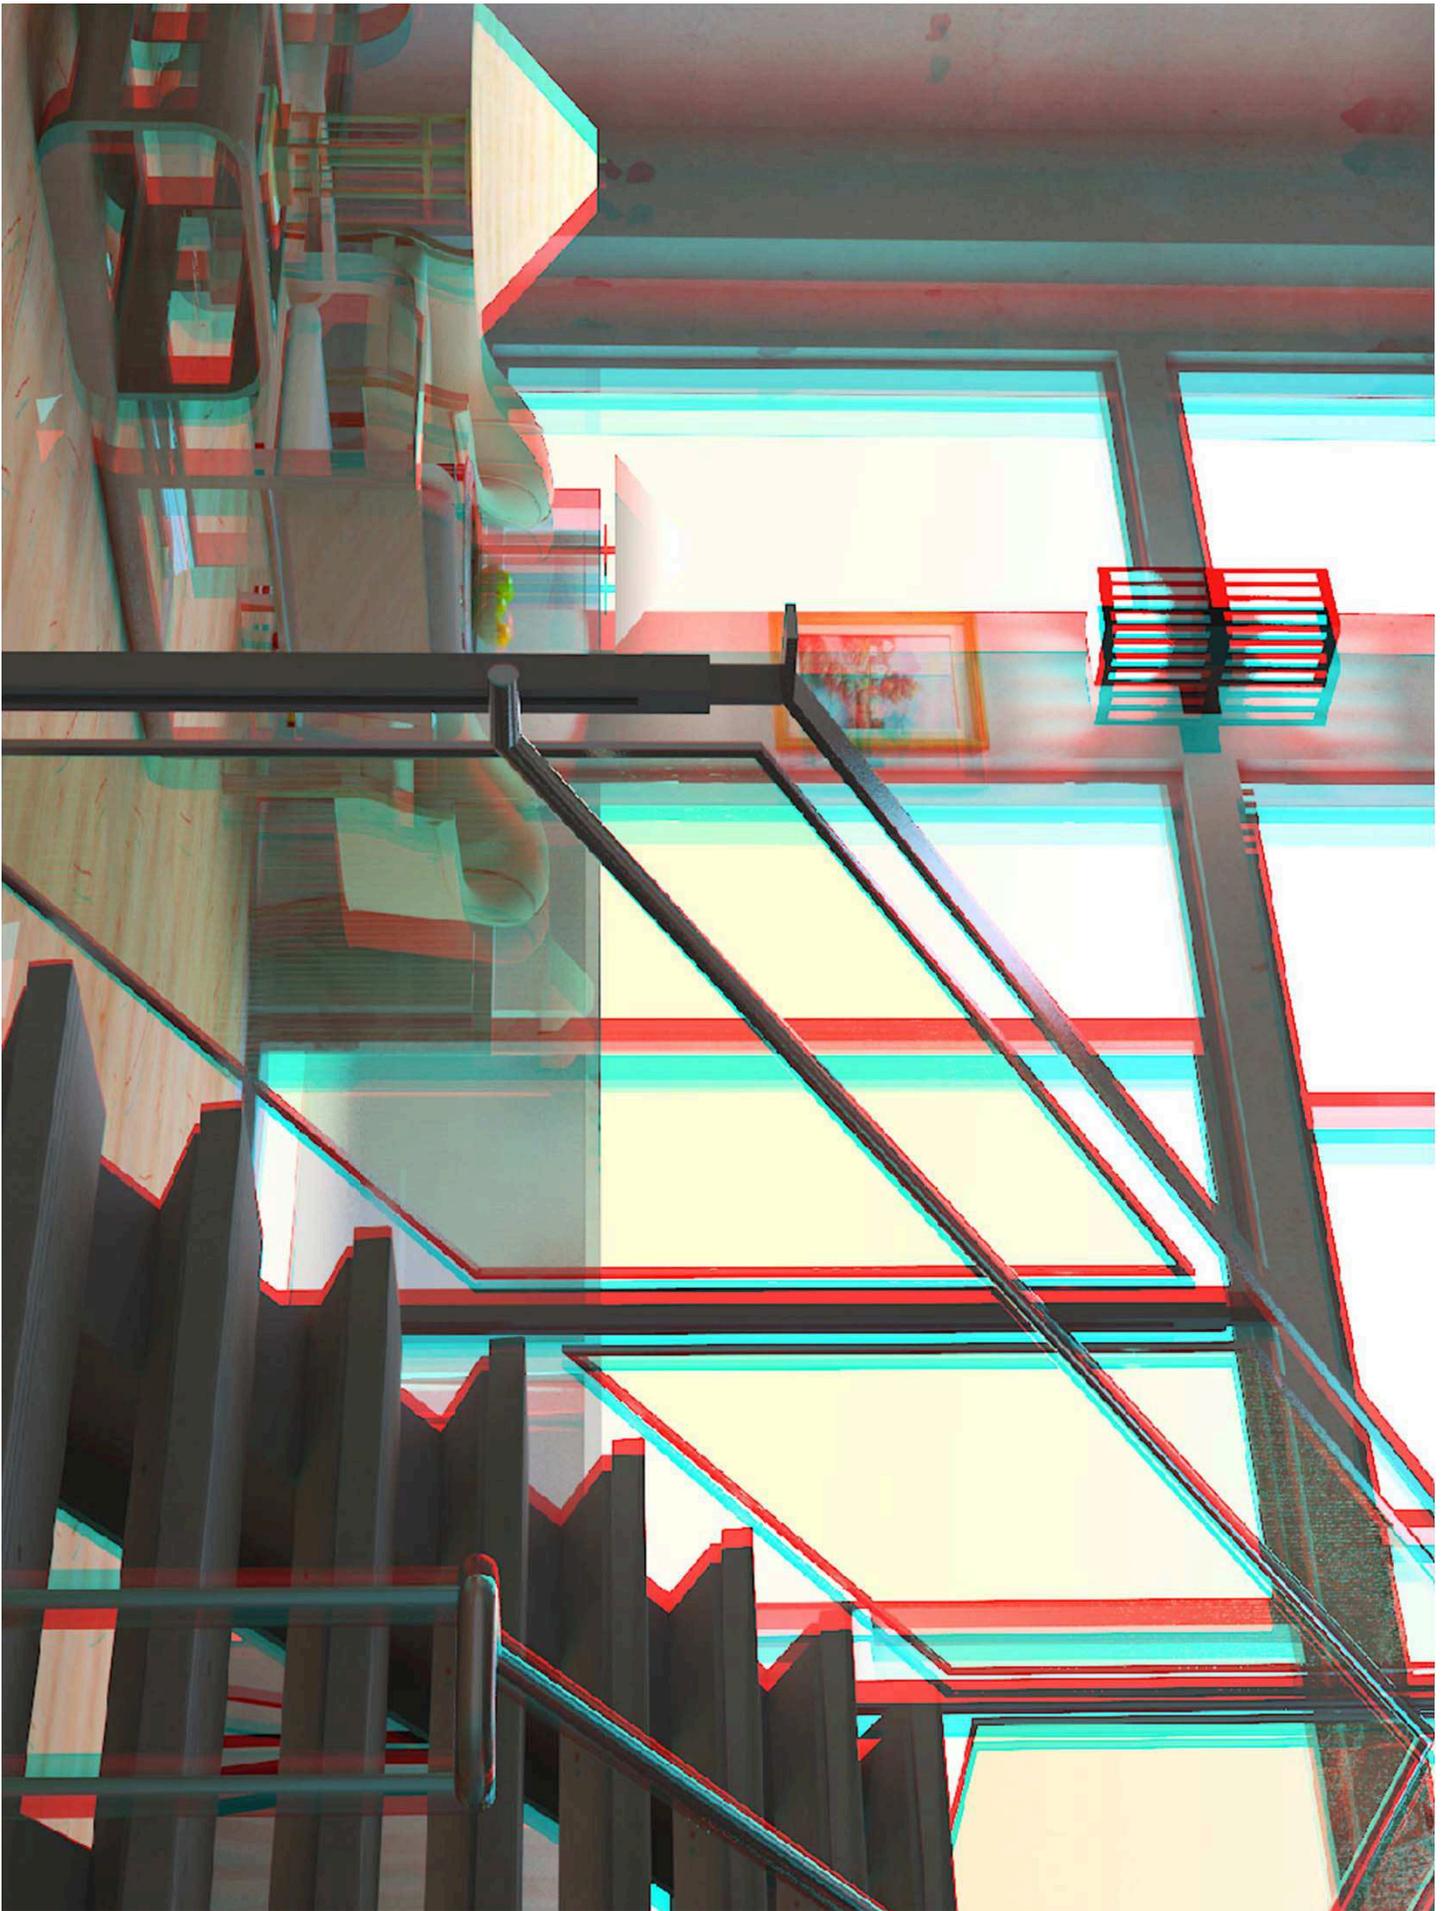

Rendering in MicroStation V8i

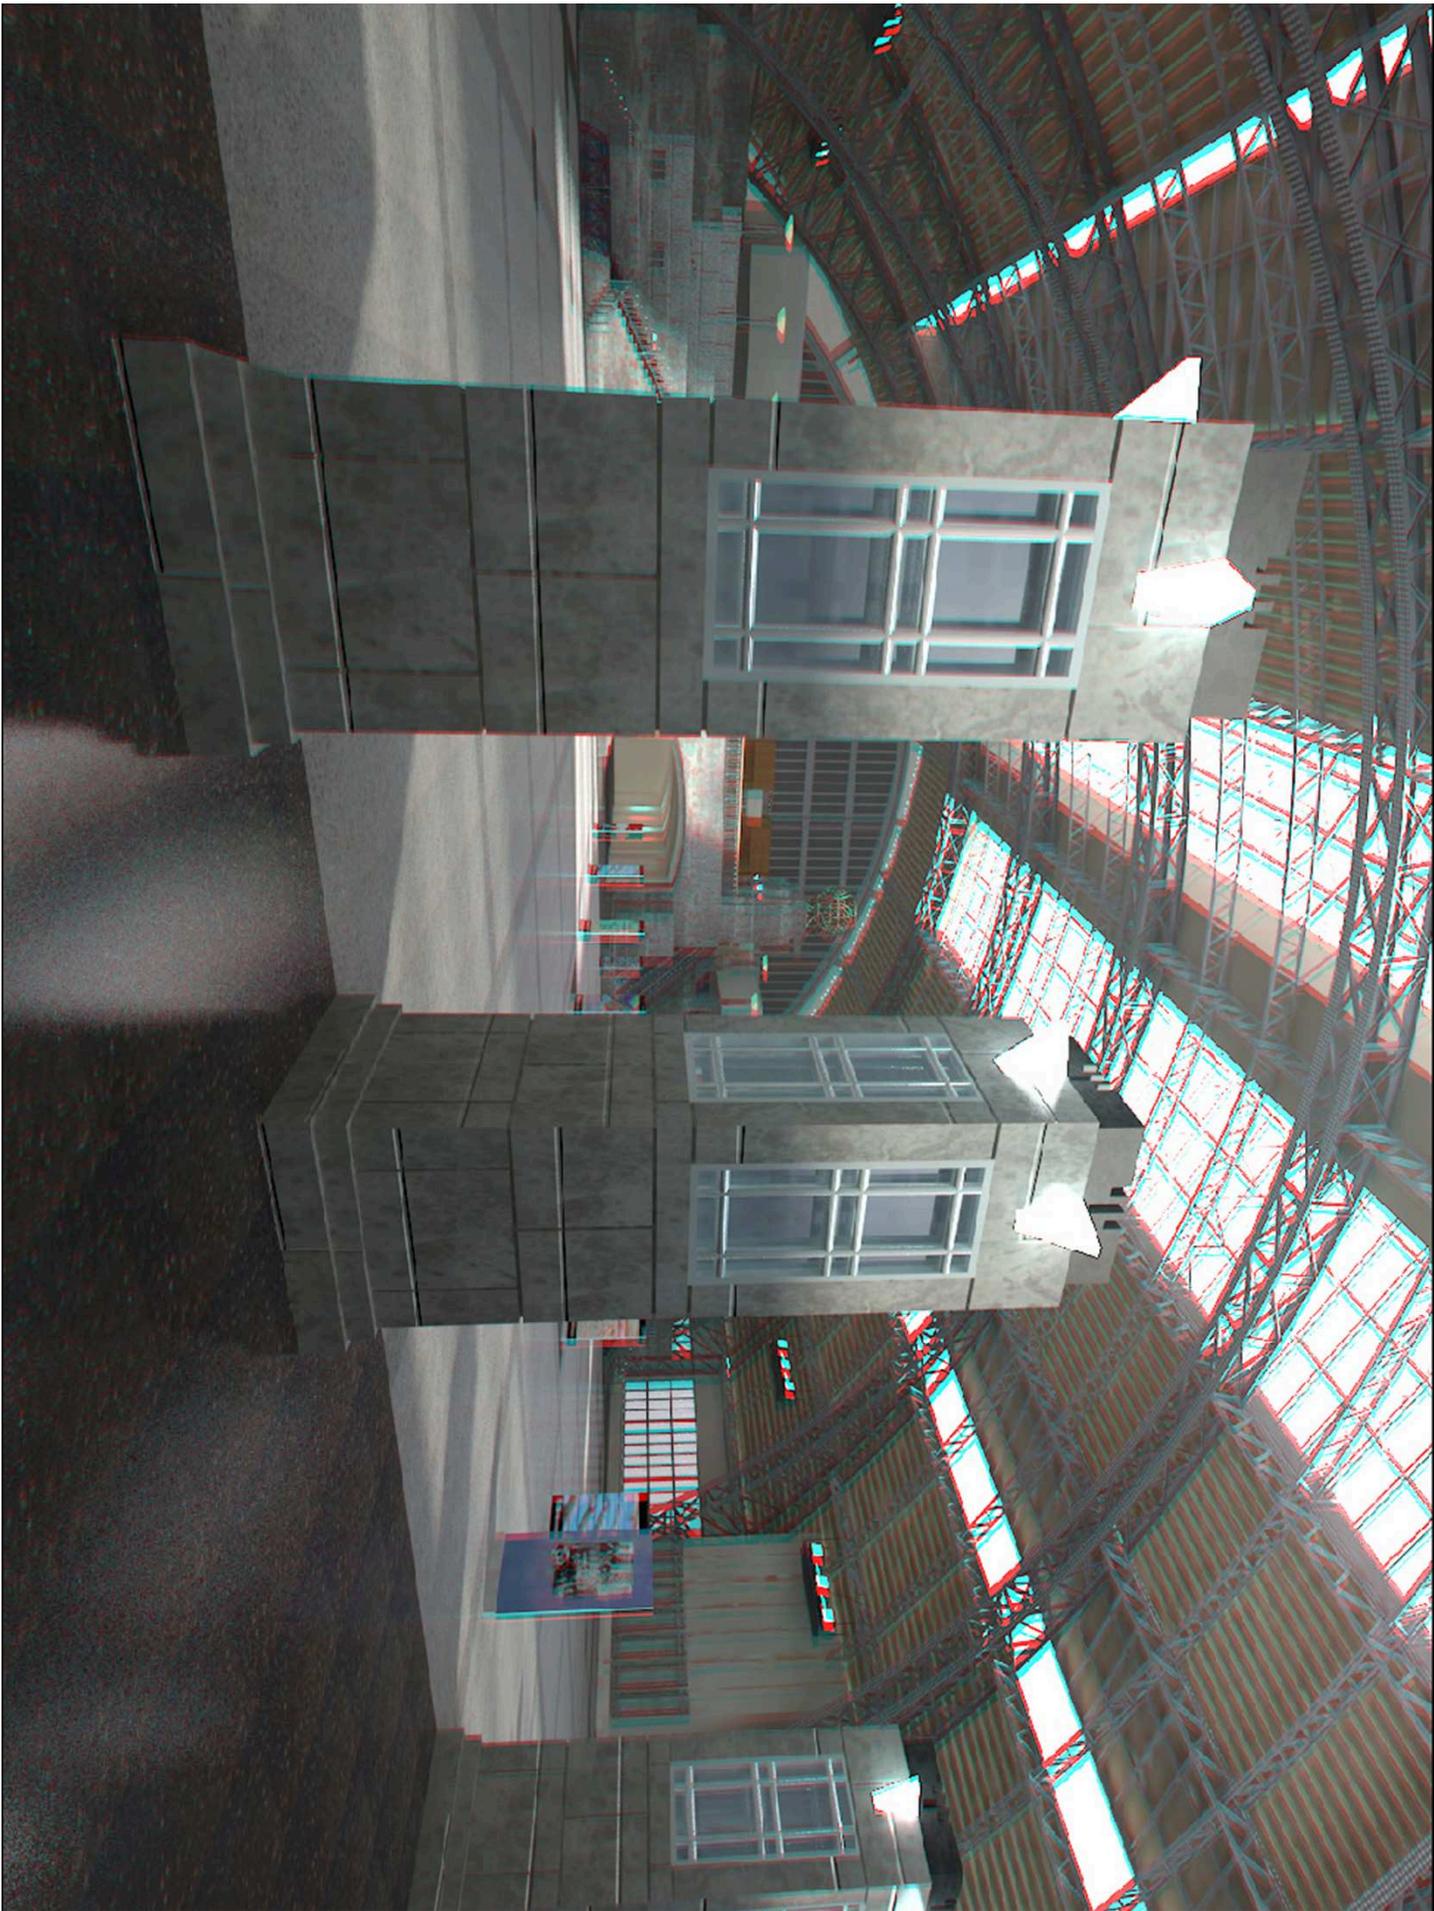

- Rendering output channels
 - More realistic renderings
 - Improves post-processing options
 - Visible edges overlay, stereo, etc..
 - Piranesi EPIX

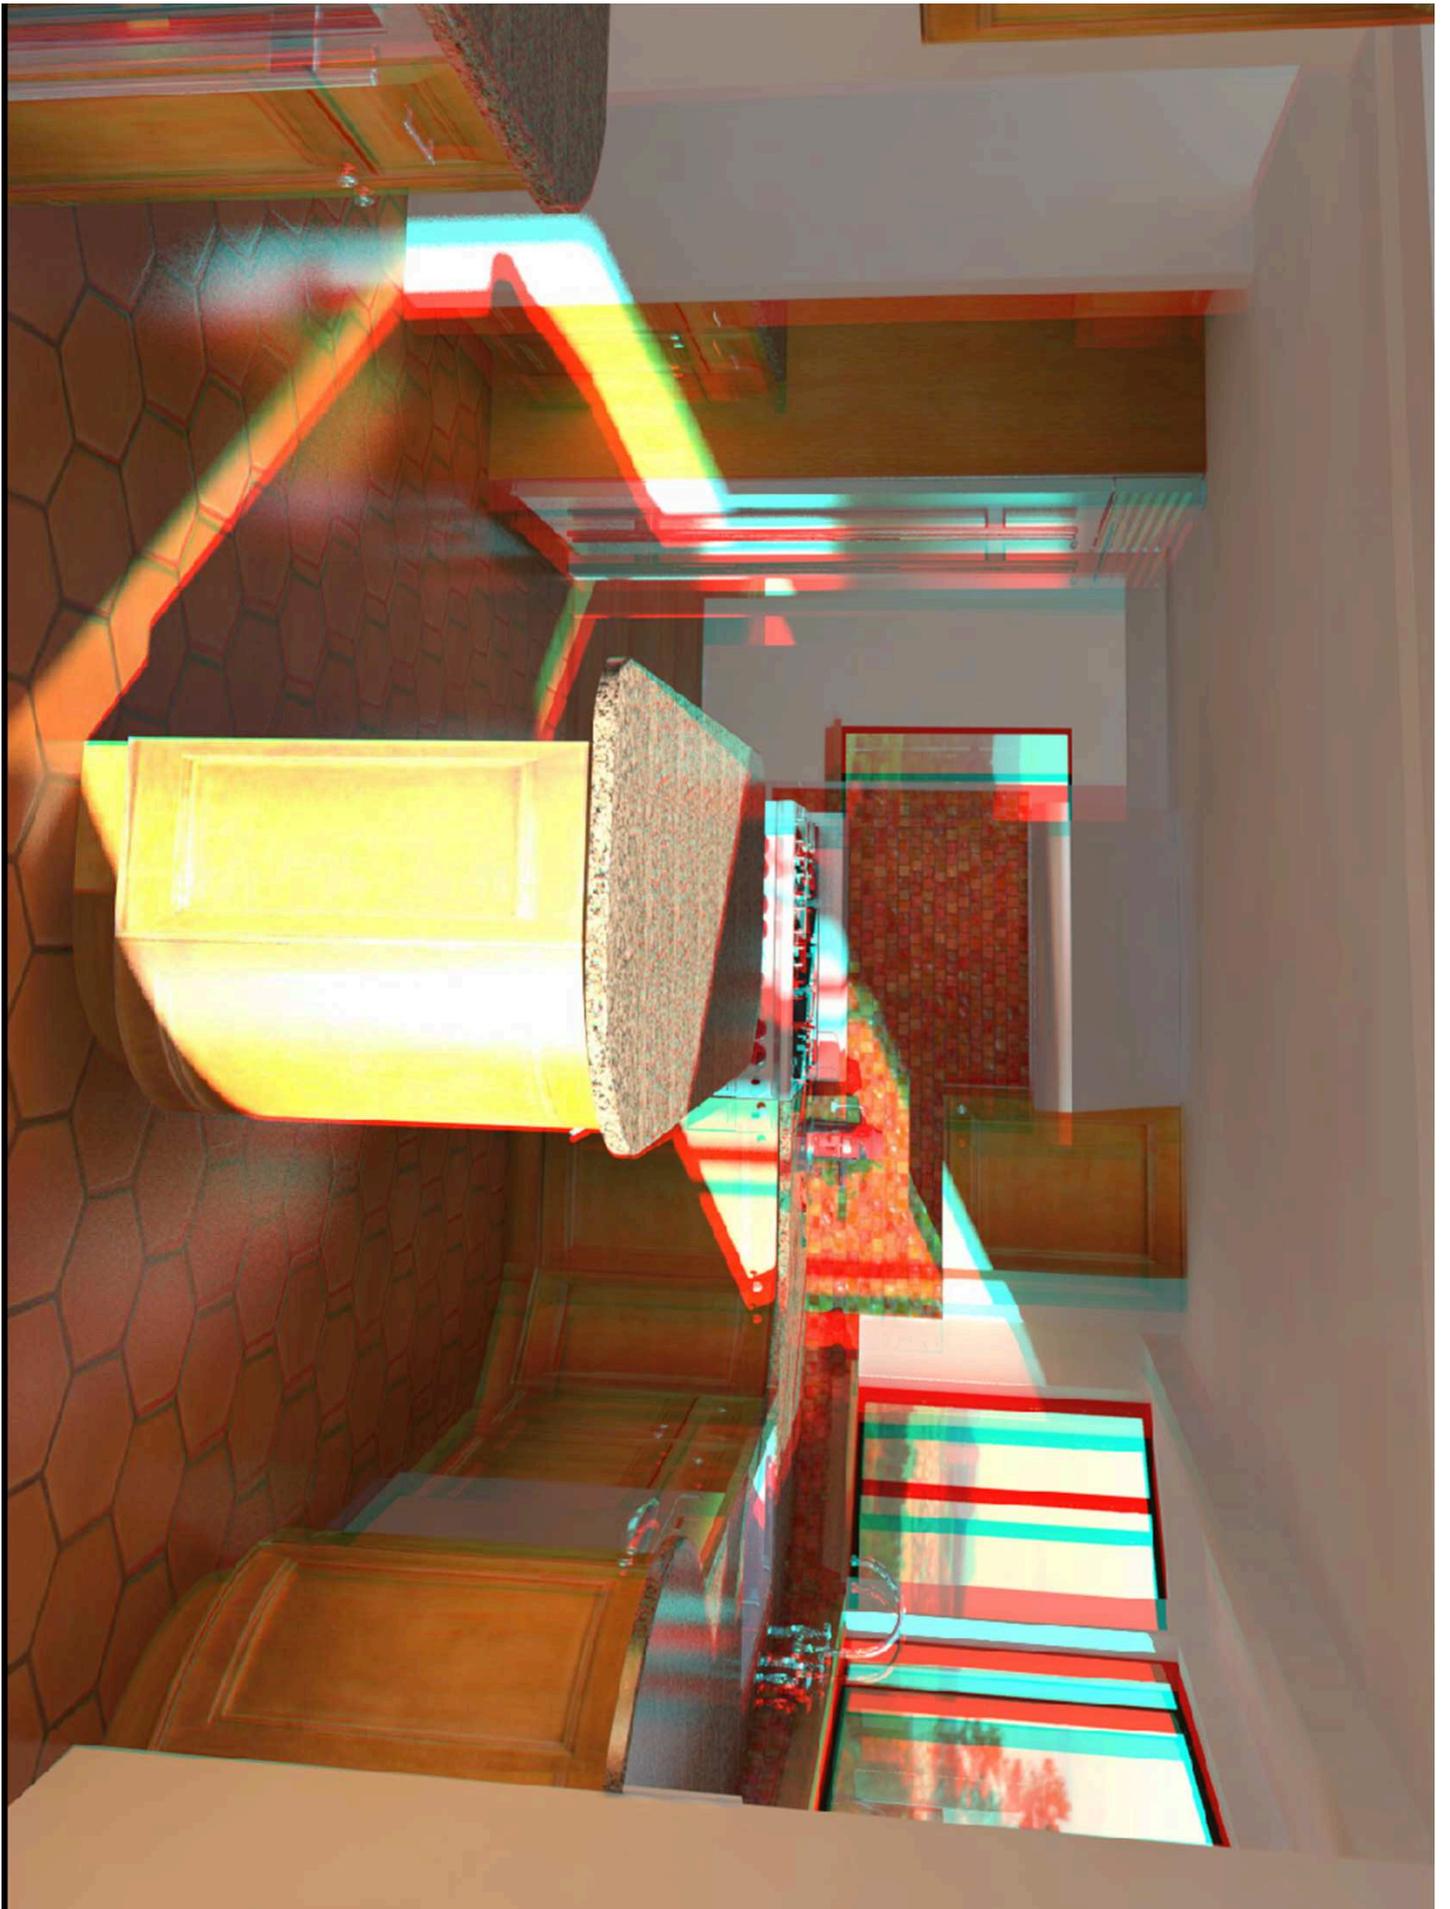

Rendering in MicroStation V8i

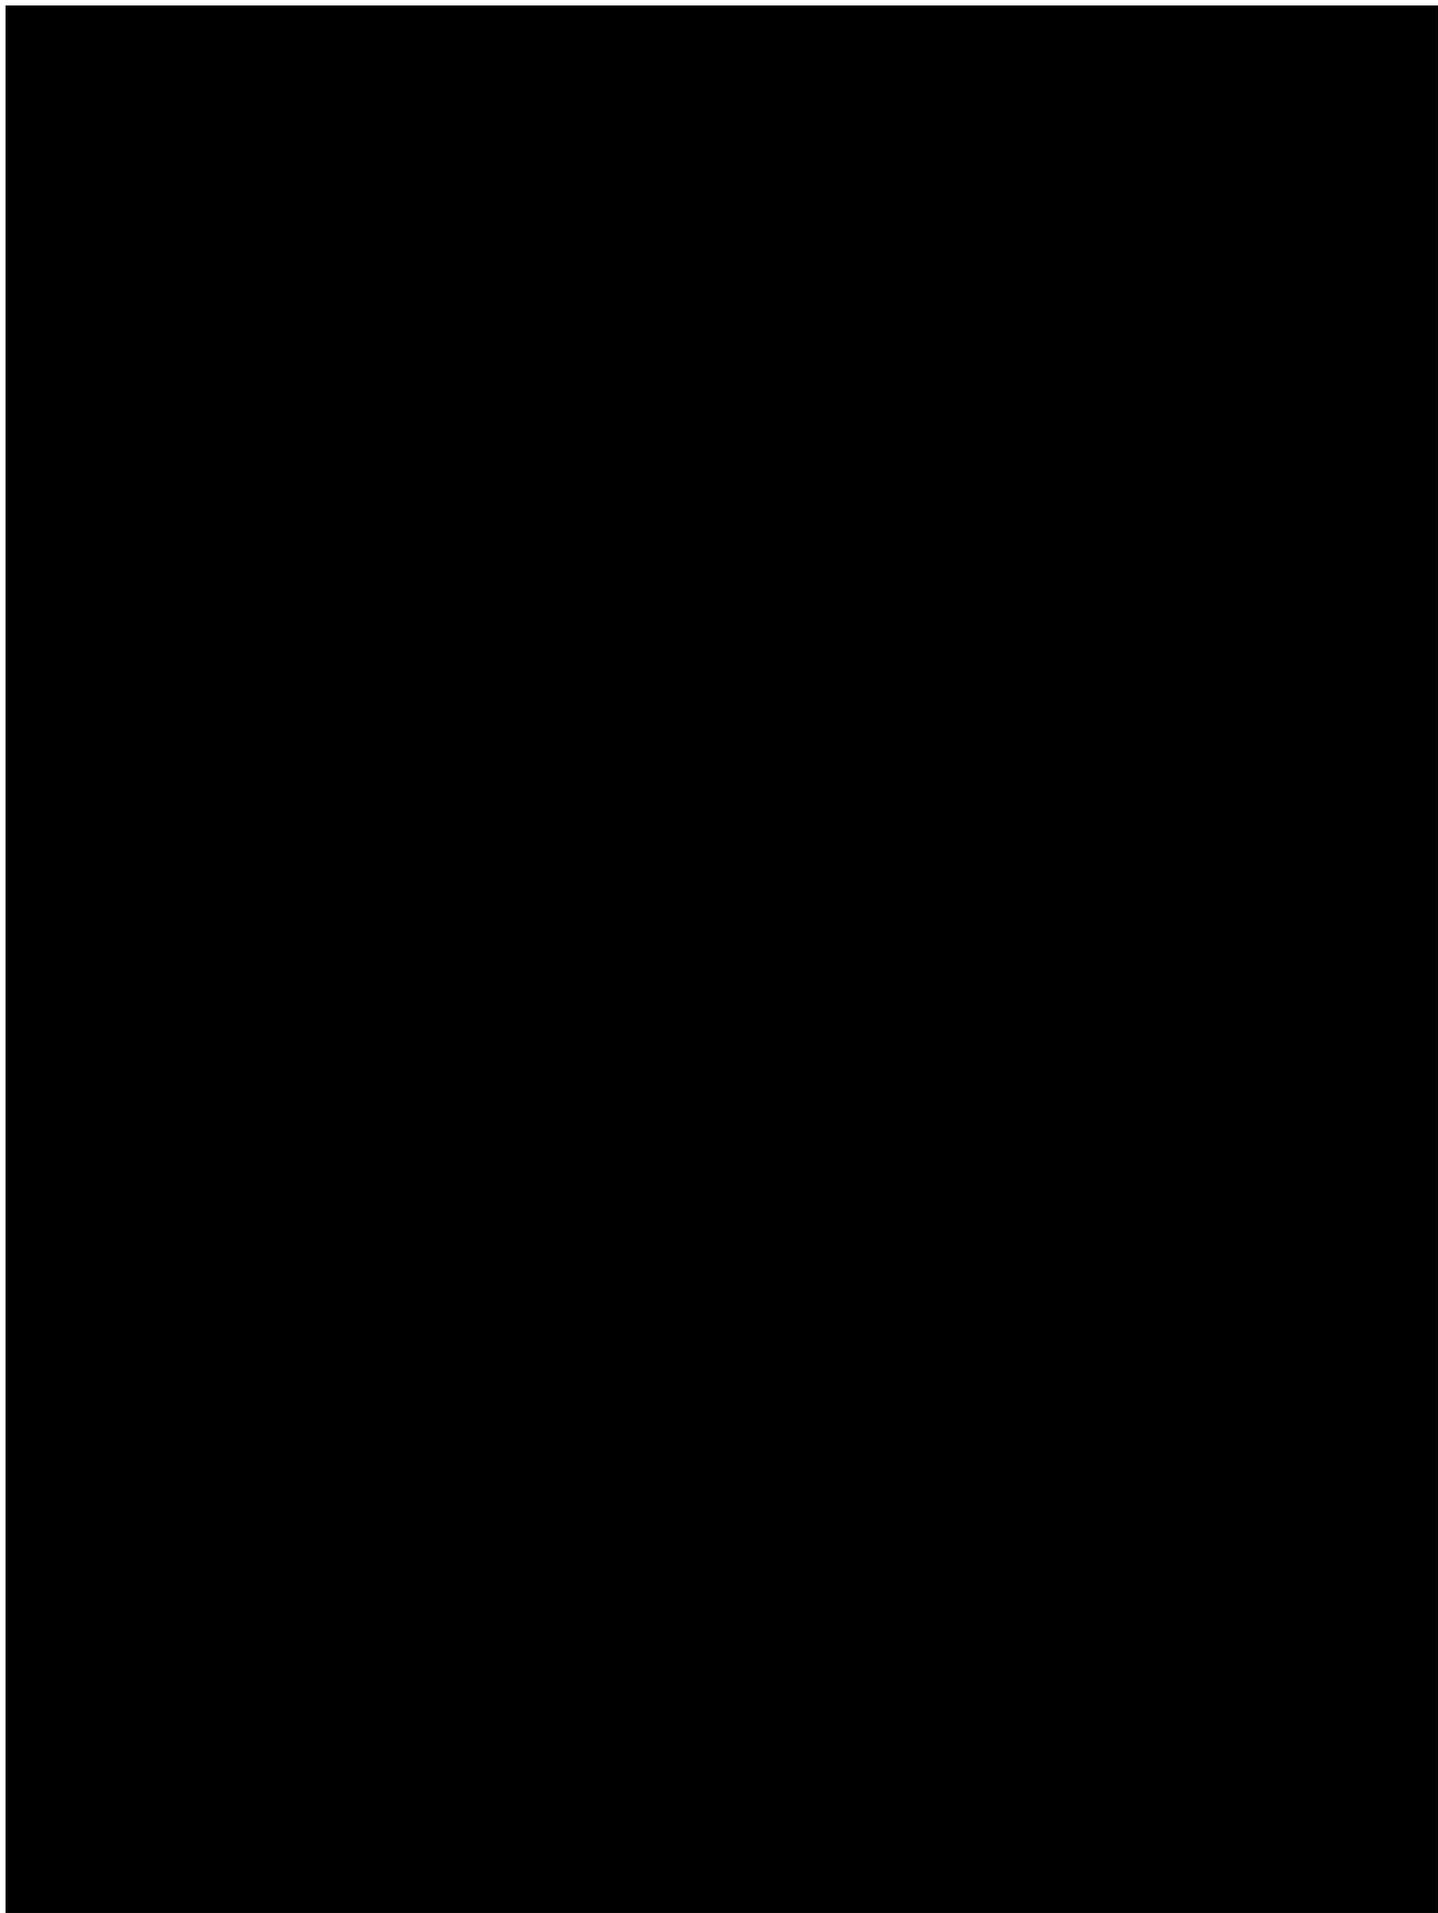

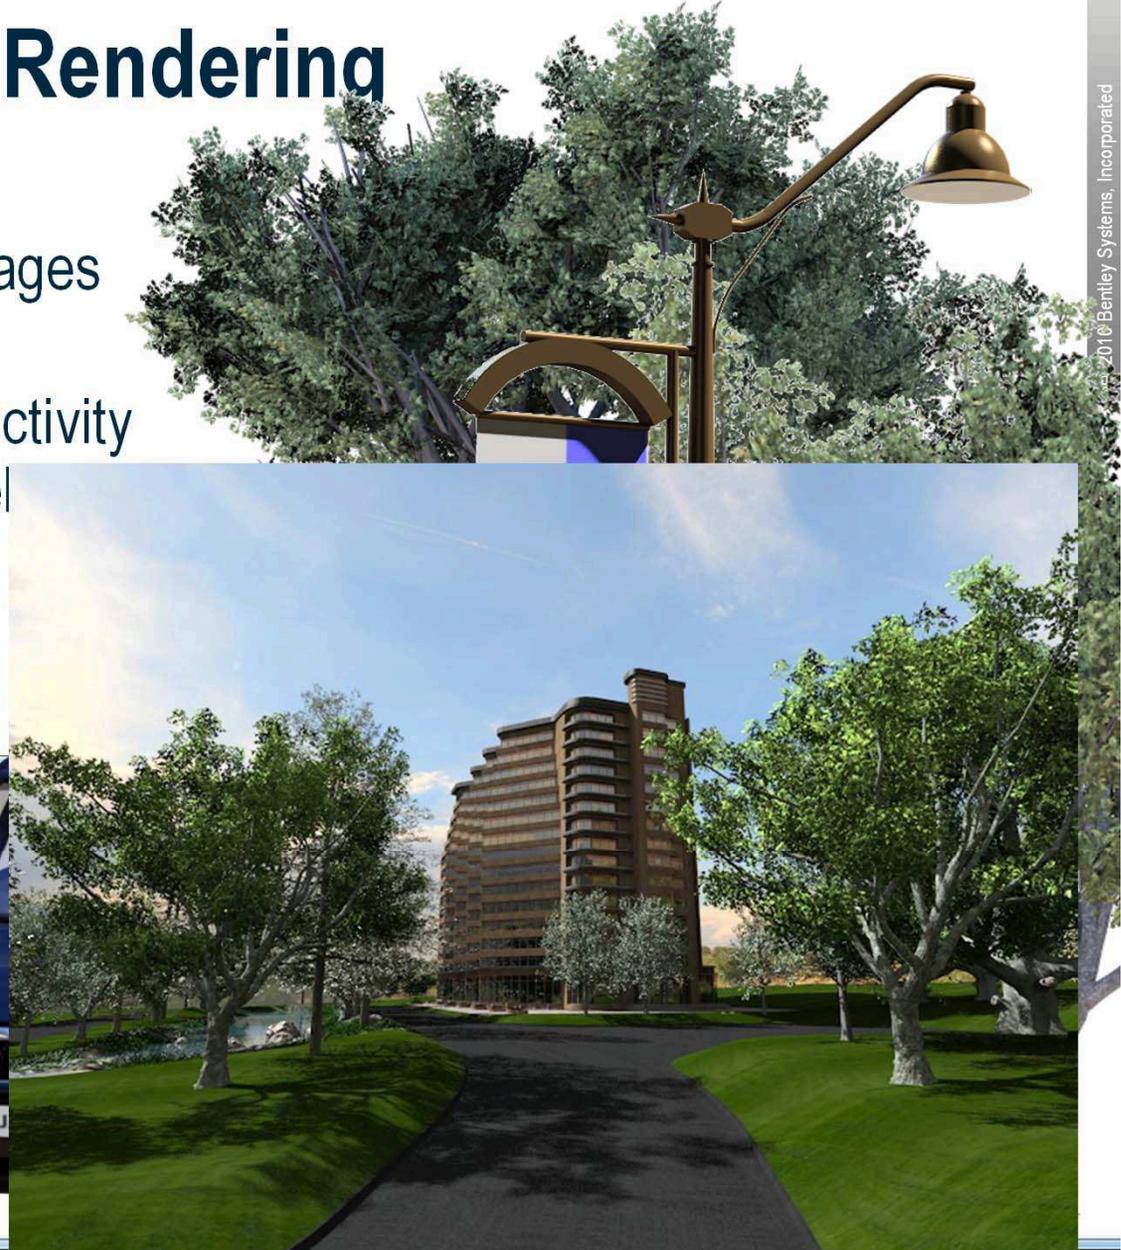

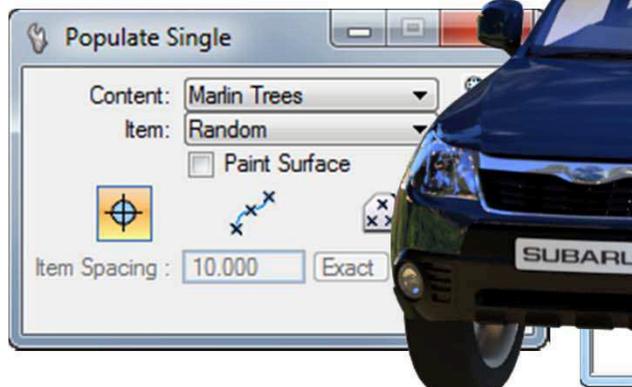

Iterative Luxology Rendering

What's Ahead in MicroStation V8i (SELECTseries 3)

Iterative Luxology Rendering

- Model Population
 - Improved realism of images and animation.
 - Greatly improves productivity for populating 3D model
 - Random Scaling and Rotation Options
 - Paint Content
 - Place Along Path

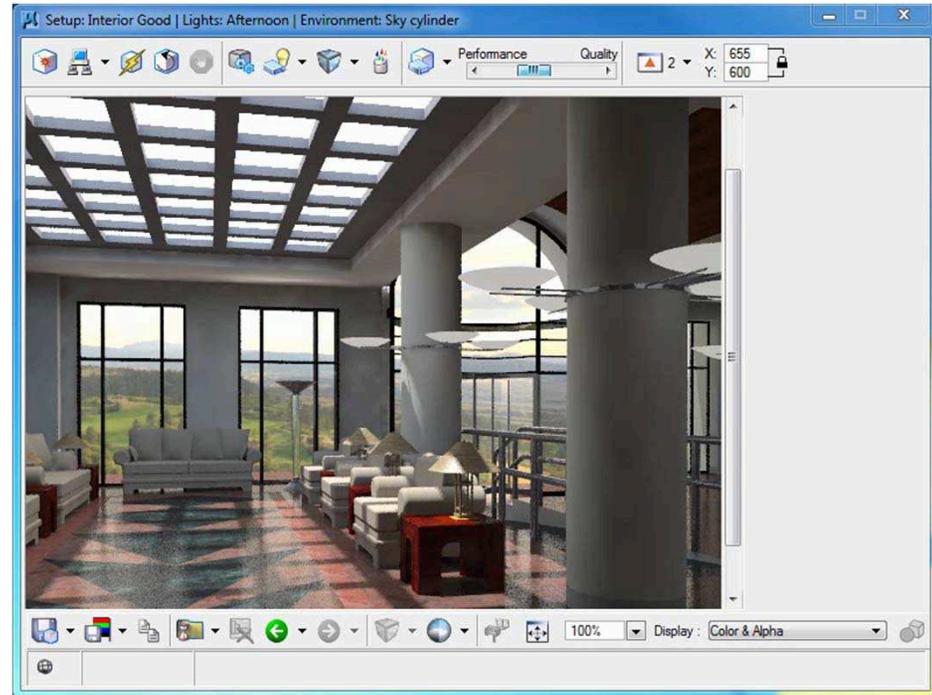

© 2010 Bentley Systems, Incorporated

Iterative Luxology Rendering

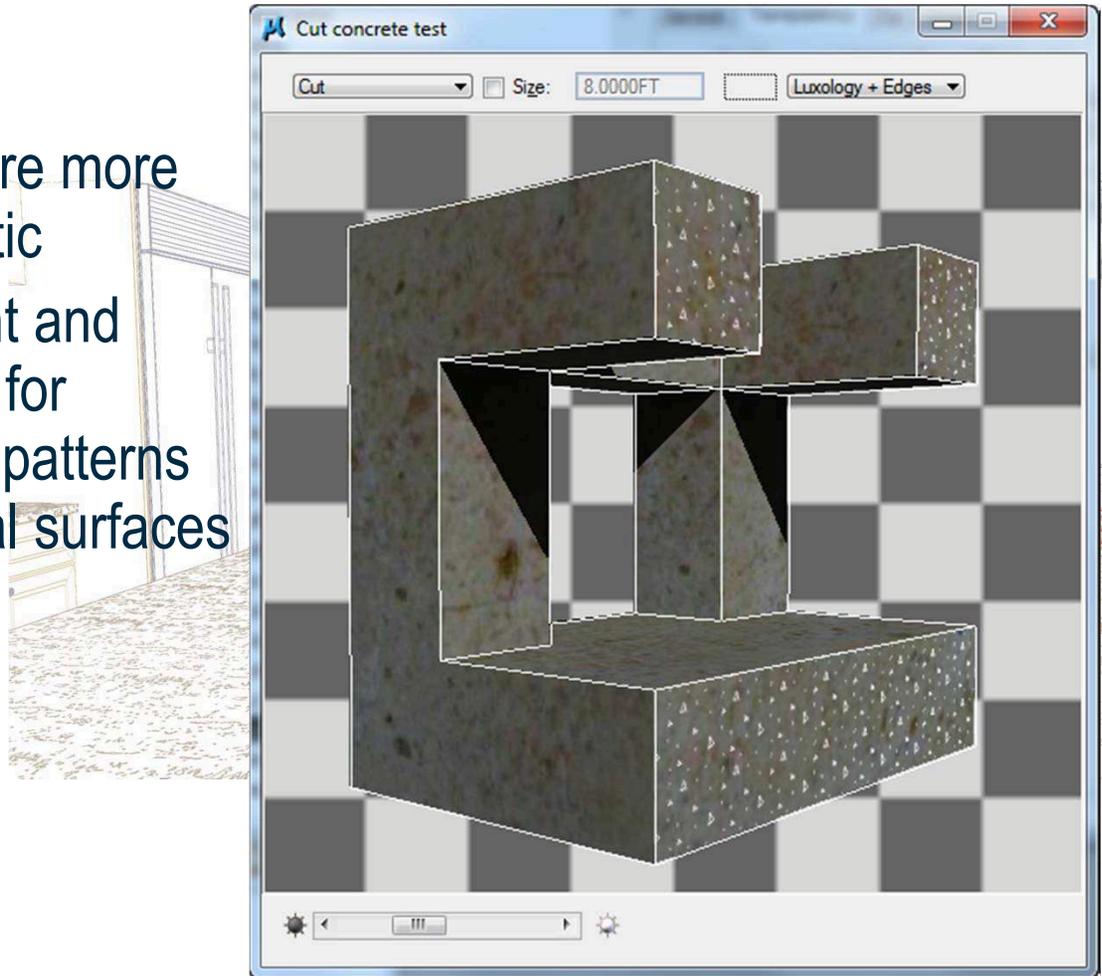

Fast Preview

- Significantly decrease the time to create images by increasing the speed of previews
- Regenerates a photo-realistic rendered scene in near-real time
- Material Preview
- Light Preview

Iterative Luxology Rendering

- Geometry Maps
 - Hidden line views are more accurate and realistic
 - Provides an efficient and convenient method for applying geometric patterns to three dimensional surfaces
 - Sections and Cuts!

Iterative Luxology Rendering

- Pavement Marking
 - Create realistic traffic renderings and animations without additional work
 - Creates 3D render ready pavement marking from 2D designs

Iterative Luxology Rendering

- Traffic Animation
 - Produce compelling highway and urban animations without needing specialized knowledge or software.
 - Provides a workflow centric approach making it easy to create complex animations of traffic
 - Vehicles align to roadway
 - Vehicle speed variation
 - Merging and Exiting Traffic
 - Vehicles maintain safe distance

Iterative Luxology Rendering

- More Great Capabilities
 - Native RPC Support
 - Update Procedural Textures
 - Auto Color Map Gamma
 - Material Stroke Tolerance
 - HDR Image Preview

Infinite Processing Power

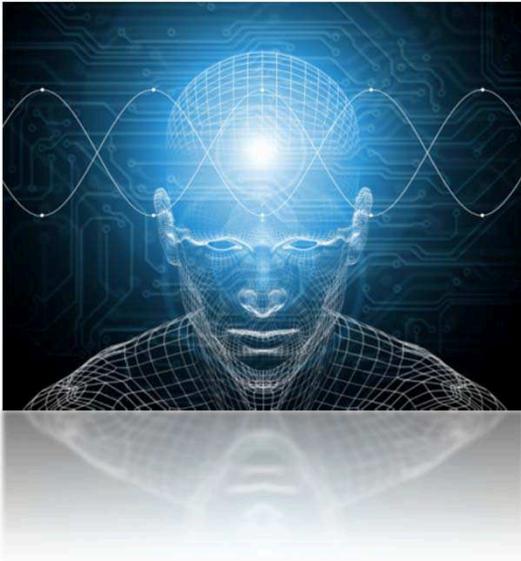

- Distributed Rendering
- Rendering in the Cloud

In Summary...

With MicroStation V8i...

...satisfy all render needs in one product

The Iterative Advantage

- Save Time
 - Near real-time rendering
 - 64-bit rendering engine
 - Create time for more design review iterations
- Improve Quality
 - Photo-realistic images
 - Better design
 - Higher Project Win-Rate
- Increase Profits
 - More Efficient Teams
 - Lower Operating Costs
