

Meeting : Civil SIG – AutoTURN Seminar

Time and place : 7. October 2009 at Grontmij | Carl Bro

Document : AutoTURN Independent Rear Steering.doc

## **AutoTURN Independent Rear Steering**

Independent Rear Steering comprises the manual rear steering feature and a library of special transport vehicles. The manual rear steering feature adds another level of control to handle complex maneuvers performed by special transport vehicles. The library included in this release consists of six generic special transport vehicle types intended for copying and adjusting to meet specific vehicle dimensions.

It is required to have AutoTURN 6.1.2 installed on your workstation, in order to import and simulate these Special Transport Vehicles with Independent Rear Steering.

First, please check your Version Number :

1. Start AutoTURN
2. Click Program Settings on the AutoTURN toolbar or menu.
3. Select the Licensing category. Check the Version number

AutoTURN 6.1.1: you require to update to 6.1.2 (free for all AutoTURN 6.1 users)

AutoTURN 6.1.2: it is possible to import and use the library of Special Transport Vehicles.

To obtain the 6.1.2 update and the library of Special Transport Vehicles, please contact us at: [support@transoftsolutions.com](mailto:support@transoftsolutions.com)

If it is an older AutoTURN version: please contact us to check your licensing details: [infoEU@transoftsolutions.com](mailto:infoEU@transoftsolutions.com)
