

Bentleyuser.dk meeting - 2022

Data Migration & Workflows

Matthias Heise,
Consultant, Civil Engineering Success Services

Types of Project Data

1. V8i (non-OpenRoads)

– e.g., SS2, SS4, SS10

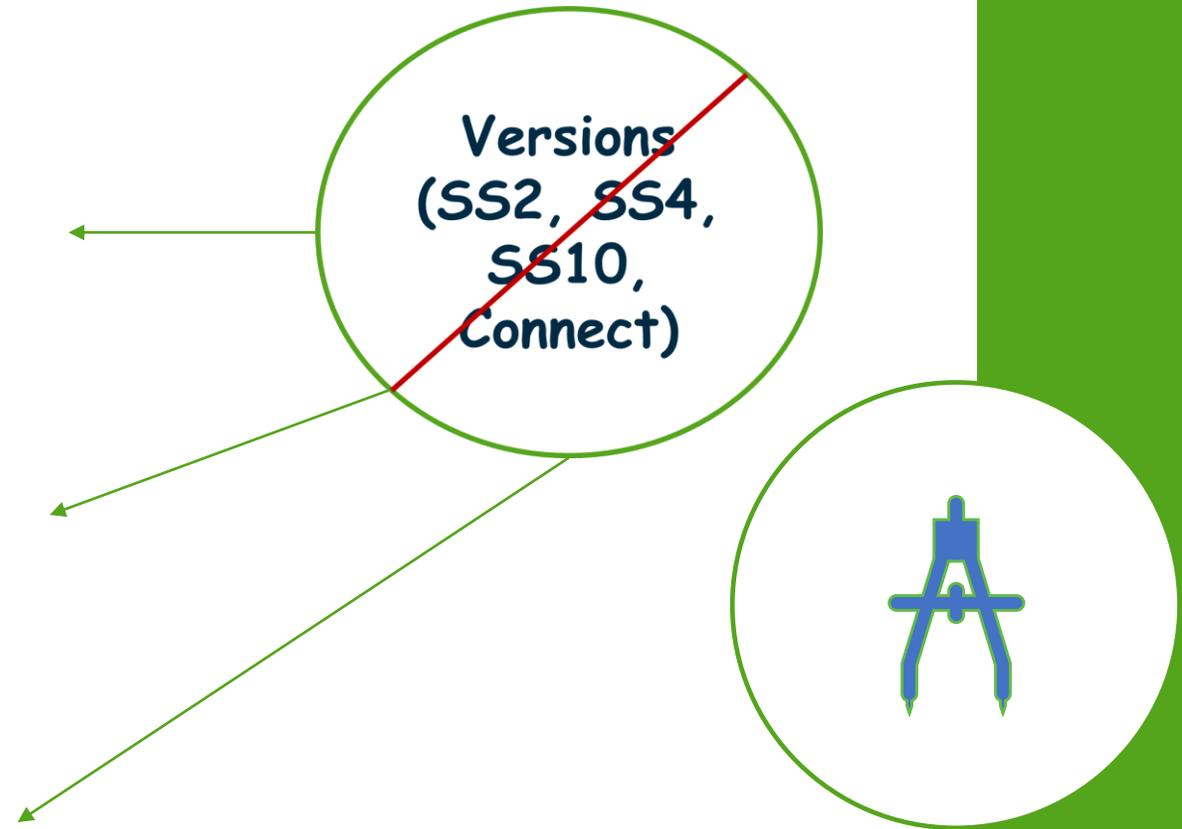

2. V8i (OpenRoads)

– e.g., SS4, SS10

3. Connect (OpenRoads)

– e.g., 10.08, 10.09, 10.10

*** Assume a Connect workspace is already created.**

Feature Re-mapper

Used to re-map feature definitions from one standard to another.

- *ITL, IRD (2021 R 2)*
- *DGN, DGNLIB (2022 R 1)*
 - *Terrain, Geometry, Corridors*
- *D&U, 3D Linear Geometry (Future)*

Element Selection

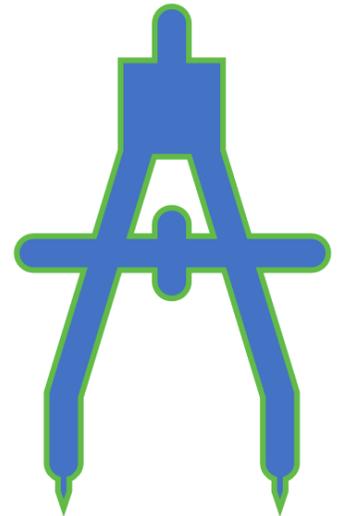

Element Selection dialog box containing various tool icons for selection and manipulation.

Key in to remap in batch mode.

CIVIL FEATURE REMAPPER PathToXmlFile *[PathToItlOrIrdFile]*

- *PathToXMLFile* – **required** path to the configuration file
- *PathToItlOrIrdFile* – **optional** (use only if re-mapping an ITL or ORD File)

Use with *Batch Process* tool to remap multiple files or entire projects!

Default

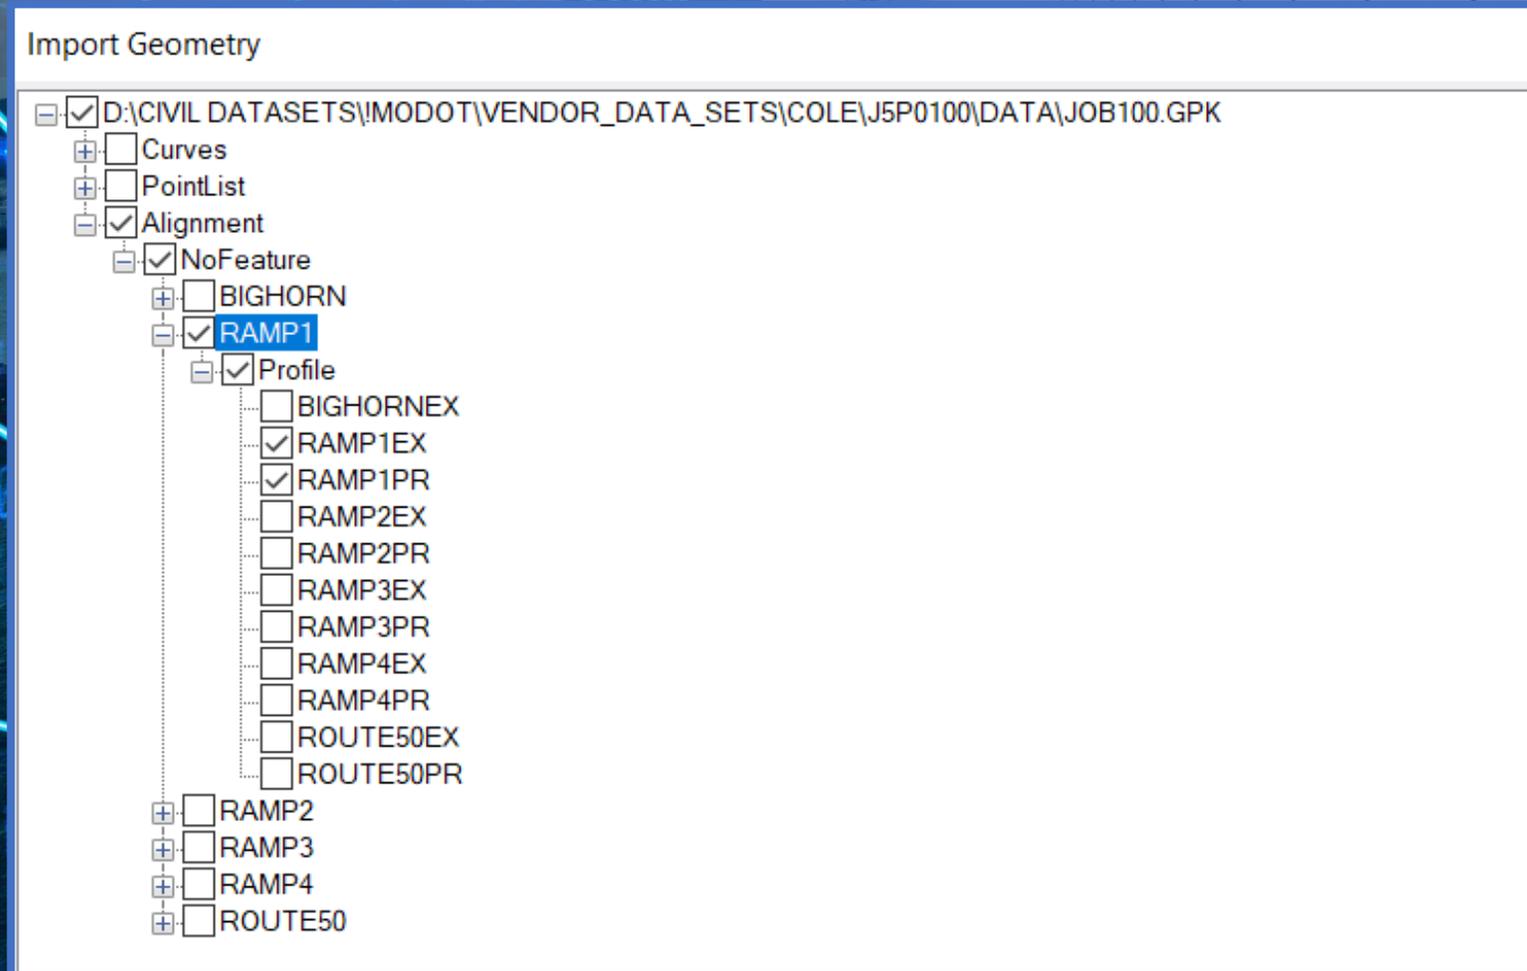

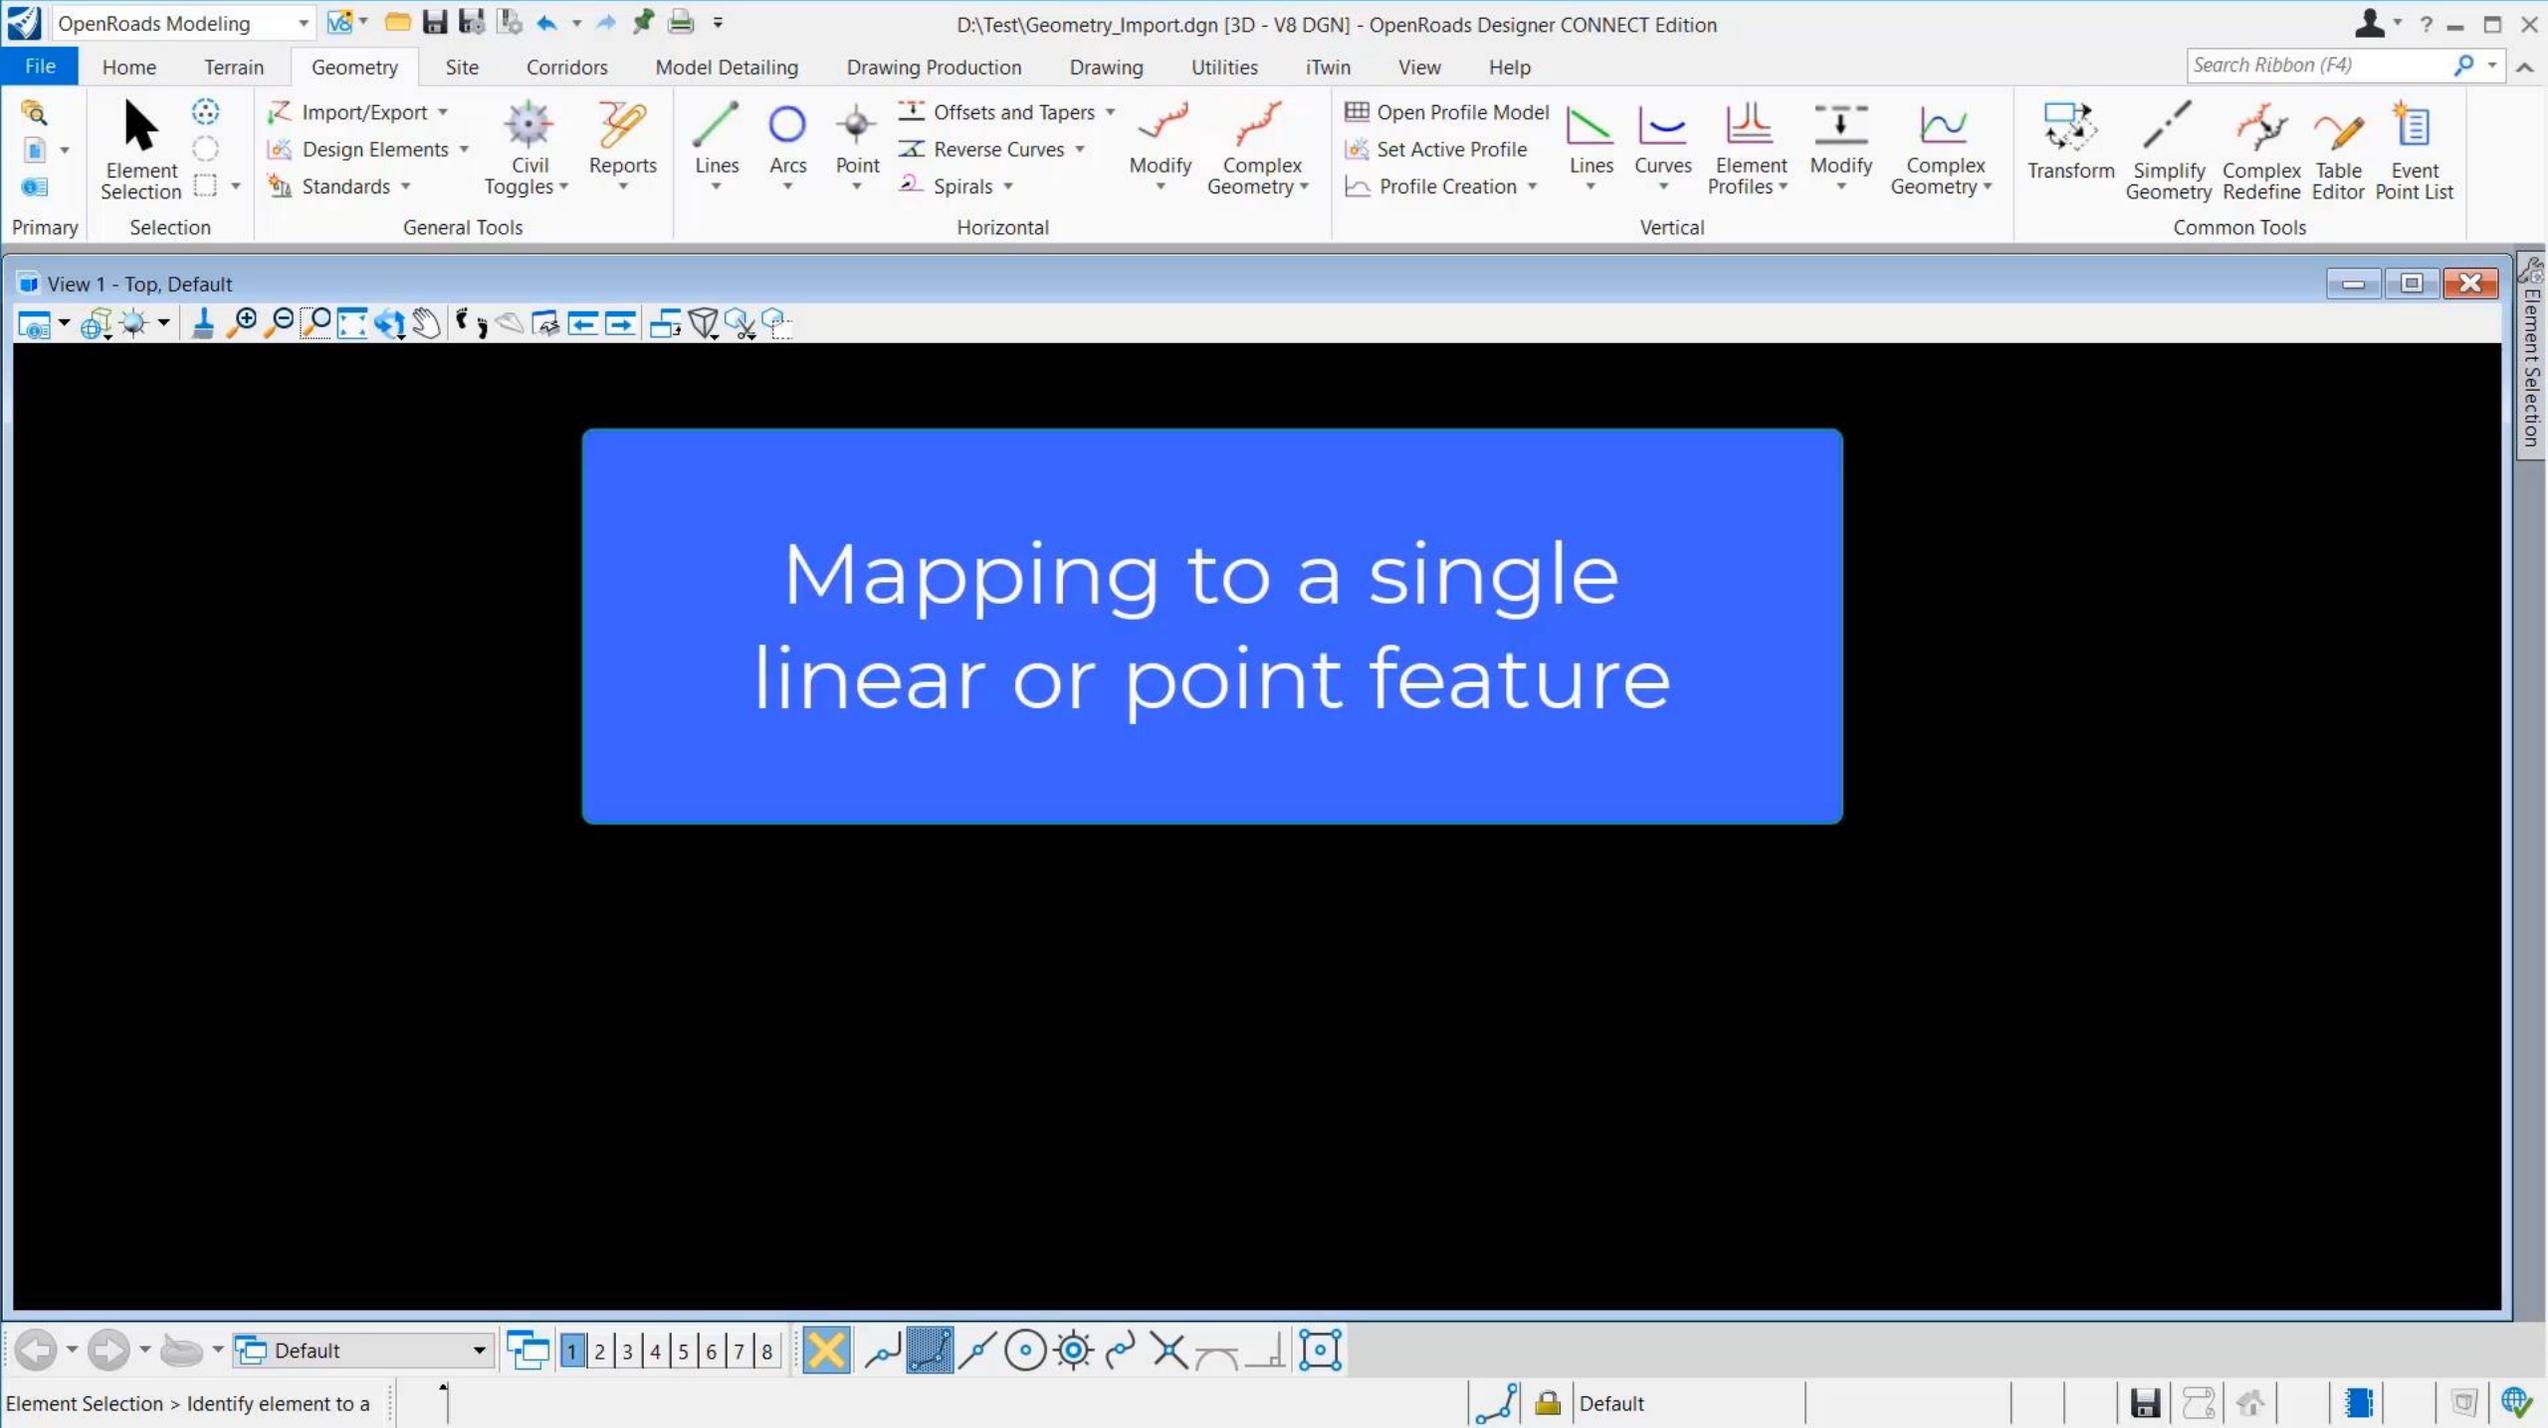

Import Geometry

Existing Ground Profiles

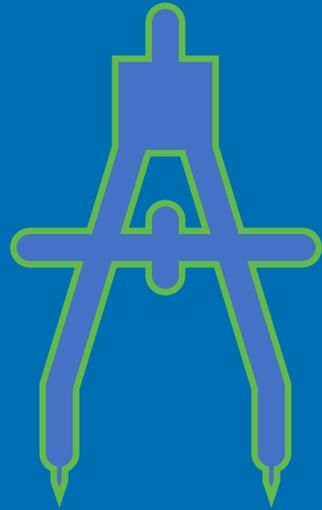

No need to import existing ground profiles. They will be generated automatically from the existing terrain.

GEOPAK

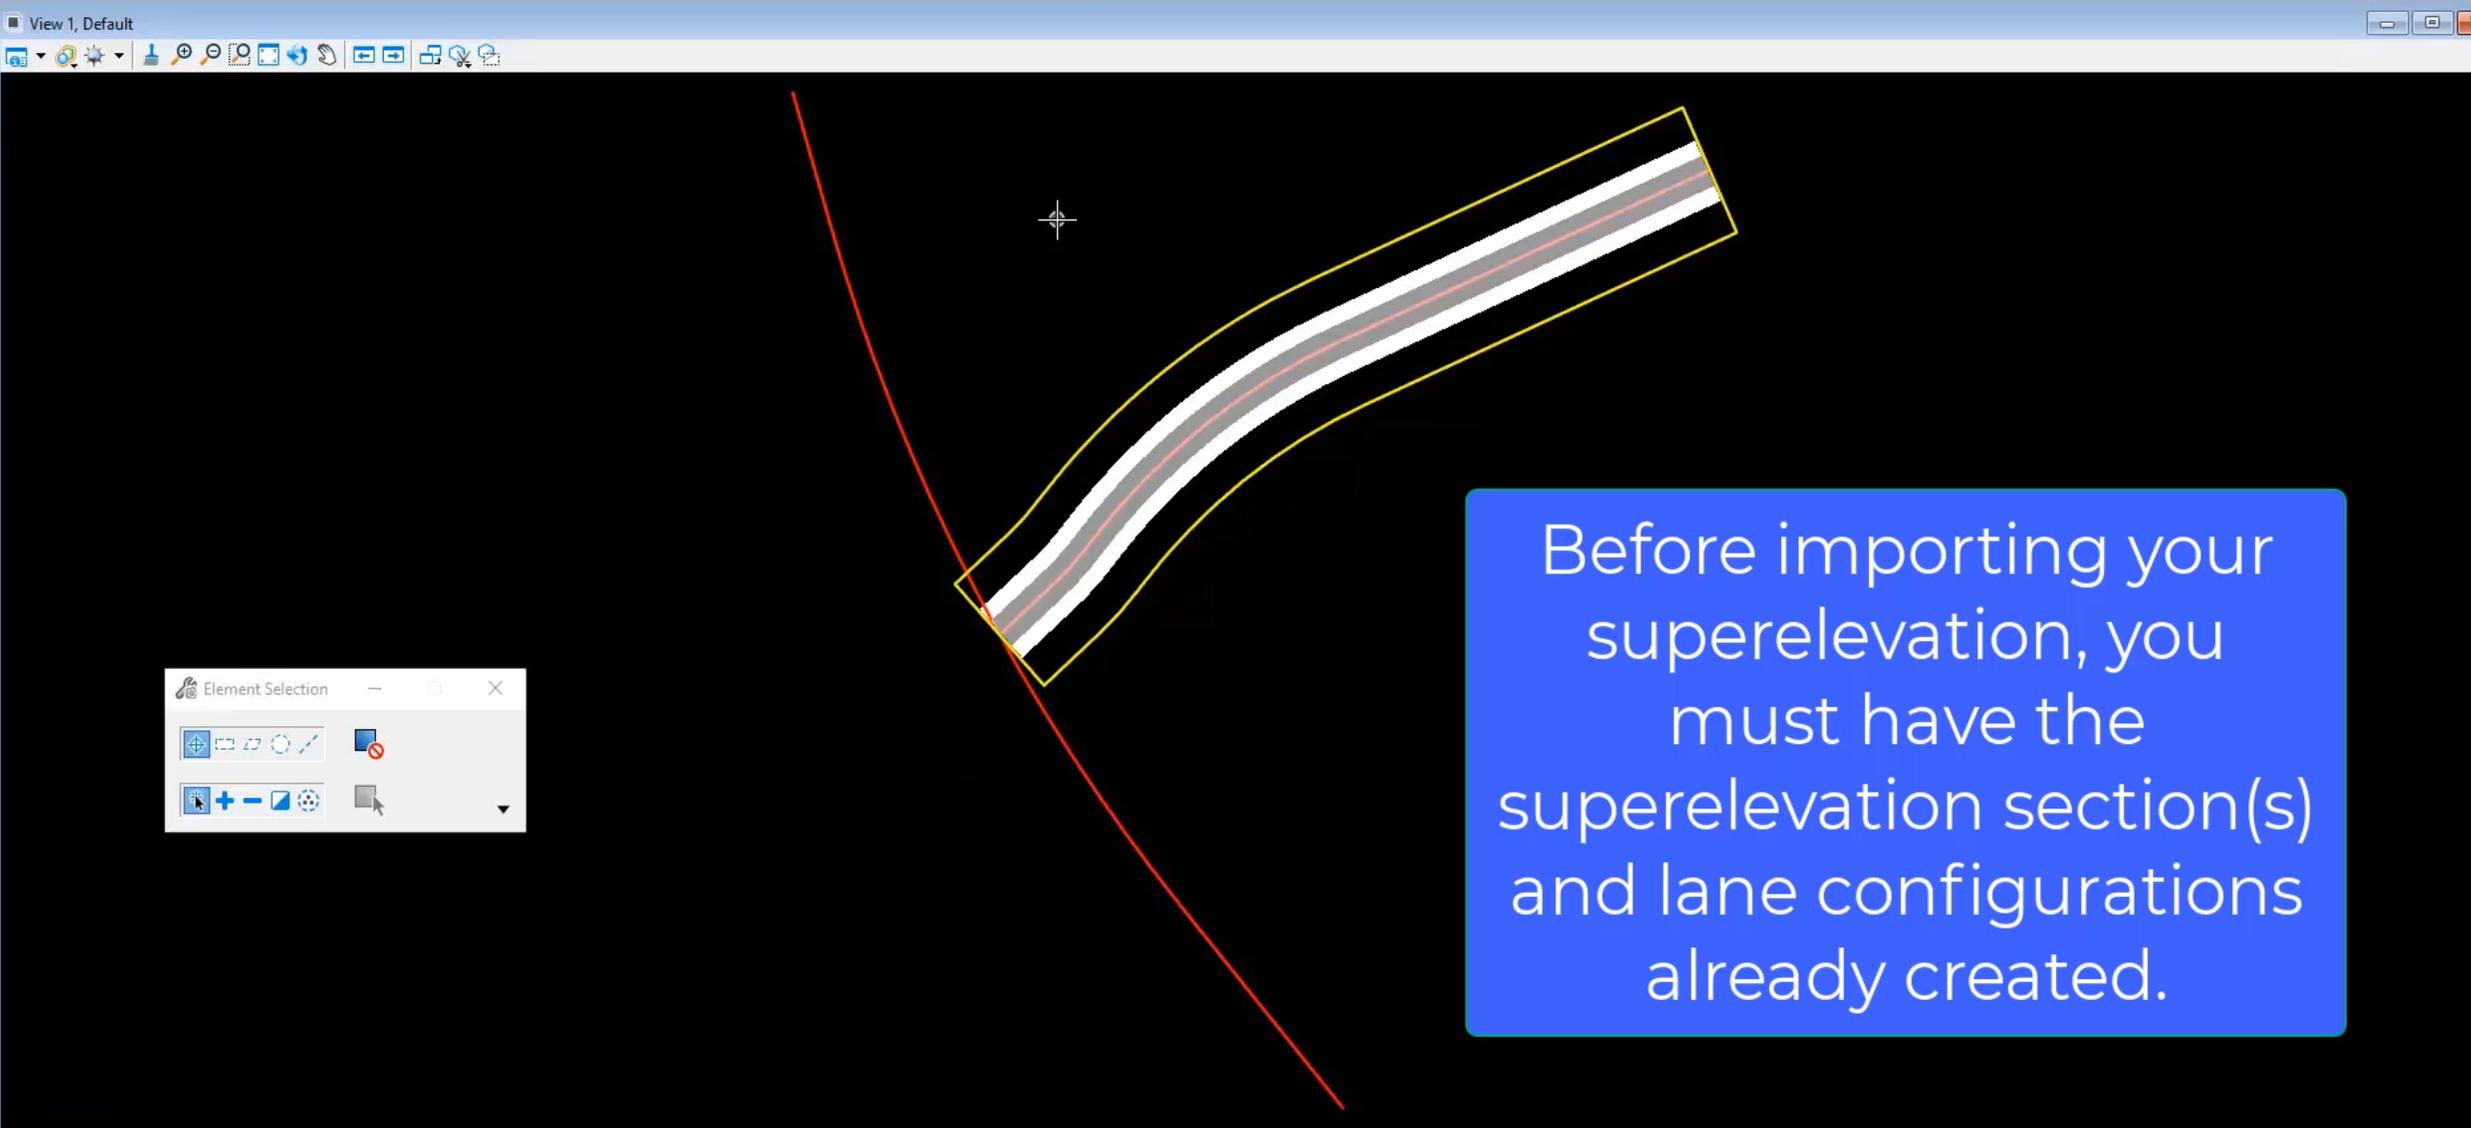

Mapping to a single linear or point feature

Import Superelevation (CSV)

Before importing your superelevation, you must have the superelevation section(s) and lane configurations already created.

Element Selection

Identify element to add to set

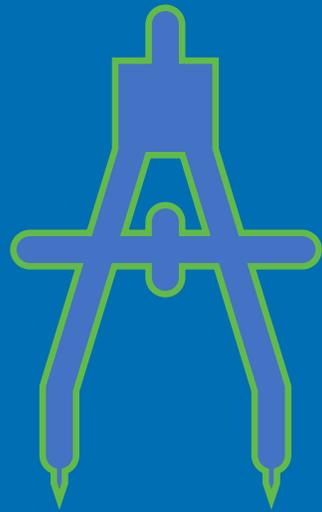

OnCleanup

Superelevation

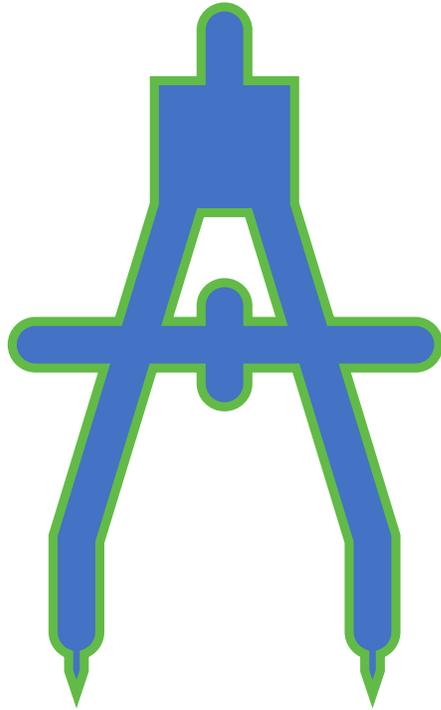

Seeing how you must create your superelevation section(s), the lane configurations and format the CSV, it may be just as *efficient* to re-calculate your superelevation from scratch.

Superelevation

Will be automatically imported as part of the IRD file. However, in that case you would not have the option of putting it in a separate file from the corridor.

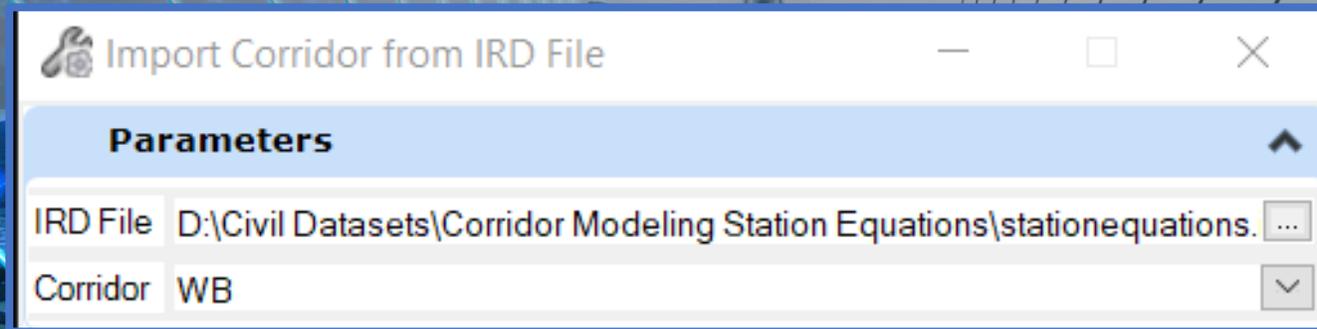

Import IRD

Reminder:

Feature definitions can be updated using the Feature Re-Mapper tool either prior to import (IRD) or you can do it afterward in the DGN.

Import IRD

Limitation: Baseline geometry must exist in the same model prior to import. However, geometry could be re-assigned to a reference after the fact.

Feature Re-mapper

Use Feature Re-mapper to address any issues with missing or re-named features.

Limitations

1. Only supports SS4 and SS10 data.
2. No support for D&U (SUDA).
3. Superelevation is *static*.

Import SUDA

- From V8i, create a **Selection Set of your SUDA data.**
- **Subsurface Utilities > Project > Export > Export Submodel.**
- **From ORD, Import Utilities > Import OpenFlows Submodel.**
- **Set/Modify Features.**

Side-by-Side Installations

Side-by-Side

Gives you the ability to install multiple versions of *OpenX Designer* products on the same machine.

Introduced in 2021 R 1 (10.10.01.03).

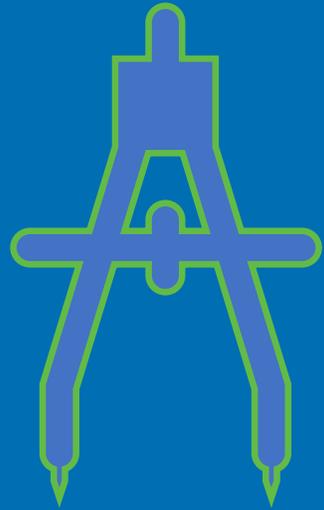

Major vs. Minor

Side-by-Side installations only apply across **Major** versions. If you attempt to install a **Minor** version alongside its parent it will upgrade as in the past.

Side-by-Side: 10.**09**.01.33, 10.**10**.01.xx, 10.**11**.00.xx

Upgrade Only: 10.**10**.00.xx, 10.**10**.01.xx, 10.**10**.02.xx

2022 R 1 (10.11)

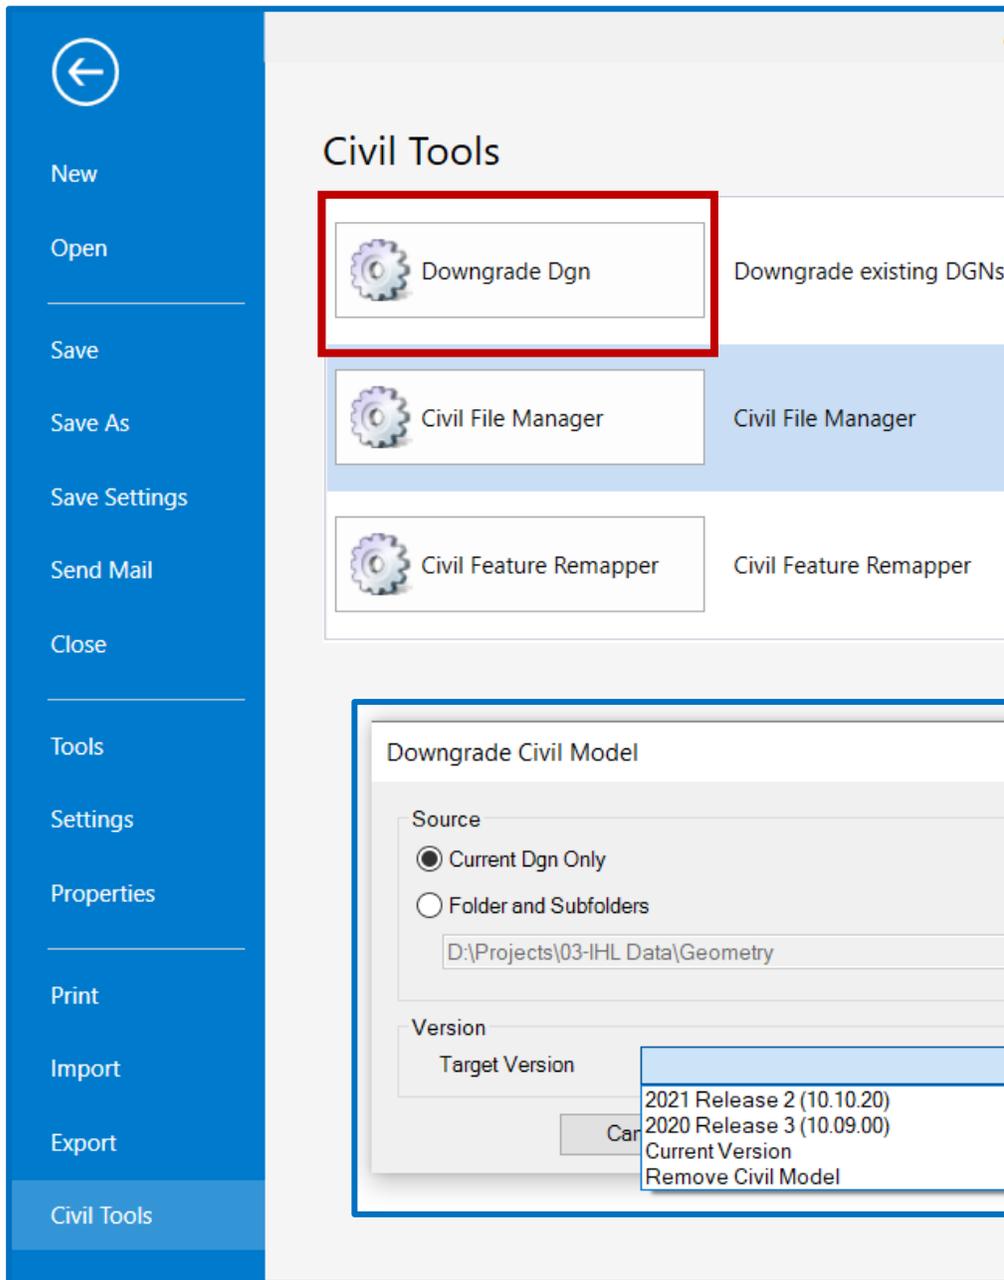

Upgrade (Project)

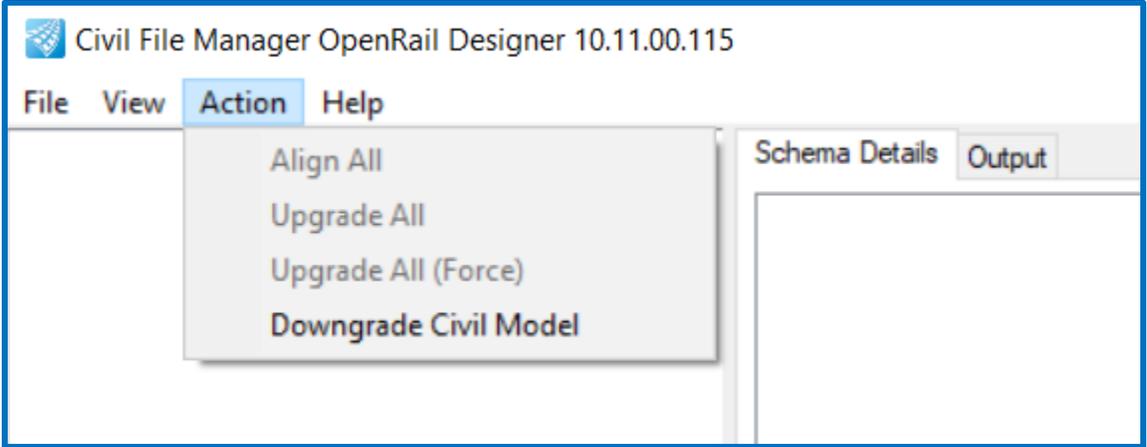

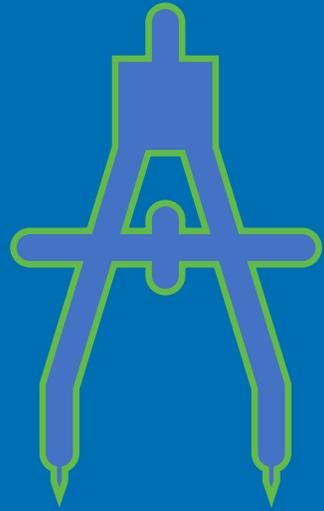

Downgrade

- Supports 2 previous versions.
- Current DGN or entire folder/project.
- *Remove Civil Model* removes all civil intelligence and leave graphics only.

Workspace Compatibility

Workspace Compatibility

Here we have 3 workspaces, one for each version of OpenRoads Designer (10.09, 10.10 and 10.11).

C:\ProgramData\Bentley\

- ▼  OpenRoads Designer CE
 - >  Configuration
- ▼  OpenRoads Designer CE 10.10
 - >  Configuration
 - >  ConfigurationORIGINAL
- ▼  OpenRoads Designer CE 10.11
 - >  Configuration

Workspace Compatibility

Keep in mind that we can use an **older workspace** (e.g., 10.10) with a newer version of OpenRoads (e.g., 10.11).
