### Focusing on Infrastructure

In the aftermath of this week's tragedy in Minneapolis, a lot of [attention](#) is focused on the nation's infrastructure. As is all too often the case, it takes a catastrophic event to shed light and bring attention to important -- often life and death -- issues. In this case, most of the attention is focused on the 600,000 bridges in the U.S. But our attention can't be limited only to bridges. The state of infrastructure as a whole in the U.S. and in the world at large is of critical importance to our collective quality of life and security.

#### What is Infrastructure?

Before diving too far into the issues of infrastructure, it might be instructive and worthwhile to define exactly what we're talking about when we talk about infrastructure. In 2004, Steven Jones of Oxford Policy Management published the results of a study for the World Bank titled "[Contribution of Infrastructure to Growth and Poverty Reduction](#)." The purpose of the study was to "present a synthesis of the links between infrastructure development and growth, service delivery and
